PUBLISHER'S NOTE

Innovation, entrepreneurship abound in region

Producing an economic profile of the Boulder Valley and Northern Colorado truly is a labor of love.

Who wouldn't want to write about a region that teems with innovation and entrepreneurship in aerospace, agribusiness, bioscience, clean tech, energy, natural products, the outdoor industry, technology and many other sectors?

Who wouldn't want to write about a region that boasts an abundance of federal laboratories, research universities, incubators, accelerators and more Startup Weeks than you can fit into a Gregorian calendar?

Who wouldn't want to write about fast-growing but diverse communities stretching from Boulder to Greeley, Fort Collins to Broomfield, as well as natural wonders ranging from Rocky Mountain National Park to the Pawnee National Grassland?

First-time visitors to this region often are amazed at the innovation that emerges from companies, laboratories and universities. They can't believe how many Fortune 100 companies are located here, or how many national brands originated here.

We enjoy relating the story of the Boulder Valley and Northern Colorado, including this latest edition of Economic Profile and Market Facts, published by BizWest Media LLC. These pages highlight major communities in Boulder, Broomfield, Larimer and Weld counties, as well as

key industries. Included are dozens of economic and demographic charts that provide the latest data available about key sectors.

This year, we've added many new charts, including a look at startup activity in local metropolitan statistical areas. As always, we welcome ideas for data or features for future editions.

In the meantime, enjoy this snapshot of what makes this region so special.

A region unmatched

Boulder Valley, Northern Colorado defy imitation

COLORADO
STATE
FOREST

GRAND

If imitation is the sincerest form of flattery, communities in the Boulder Valley and Northern Colorado should be very flattered indeed. But why search for “the next Boulder” or “the next Fort Collins” when one can find those and many other thriving communities right here?

From Boulder to Fort Collins, Broomfield to Greeley, Loveland to Longmont, the Boulder Valley and Northern Colorado constitute a region of innovation, entrepreneurship and opportunity.

And the region offers variety as well, with Greeley serving as a center for traditional agriculture and energy, Boulder as a center for natural products, the outdoor industry and technology, and Fort Collins and Loveland as a center for bioscience, veterinary medicine and high-tech manufacturing.

Add in breathtaking natural beauty and quality of life, and the reasons for the emergence of the Boulder Valley and Northern Colorado as an entrepreneurial center become as clear as the sky on a summer day.

Boulder, Broomfield, Larimer and Weld counties encompass a vast 7,342 square miles and include one of the most dynamic economies in the nation, with communities consistently ranked among the most desirable places to live.

Snuggled against the majestic Rocky Mountains to the west and the Great Plains to the east, this region begins just north of Denver, with close proximity to Denver International Airport, and extends to the Wyoming state line.

The four-county region now totals more than 1 million people, up from 902,898 in 2010, according to the U.S. Census Bureau. What’s bringing all of these new residents? First is a climate of innovation and entrepreneurship, one that has sparked creation of thousands of startup companies in high tech, energy, bioscience, clean tech, natural and organics, aerospace, agribusiness and the outdoor industry.

A solid base of Fortune 100 companies fosters the region’s growth. Companies operating in the region include IBM Corp., Oracle Corp., Ball Corp., Google Inc., Seagate Technology LLC, Hewlett-Packard Co., JBS USA, Intel Corp., Twitter, State Farm Insurance Cos., Anheuser-Busch Cos. Inc., and many, many more.

The high state of innovation and entrepreneurship brought on by these companies and countless spinoffs prompted creation of Innosphere, one of several incubators that operate in the region. Innosphere recently expanded its reach into Boulder and has a growing Denver presence. TechStars has brought additional prominence to Boulder as a

startup accelerator.

And talk about quality of life.

Take larger communities such as Boulder, Broomfield, Fort Collins, Greeley, Longmont and Loveland. Place them where the plains, rich in agriculture and energy, meet the soaring Rockies. Throw in dozens of smaller communities, including Estes Park, a world-class resort destination at the gateway to Rocky Mountain National Park. Add major universities, cutting-edge federal research laboratories, a vibrant technology-transfer climate and a populace that loves its beer, bikes, bands and beef.

Its cities and towns frequently are touted among the best places to live in the United States. Its unparalleled quality of life attracts a talented and educated workforce that is well-educated; an infrastructure that allows convenient connections to the rest of the world, both physically and electronically; and a diverse economy as strongly rooted in agriculture and oil-and-gas drilling as in alternative-energy development and the promise of bioscience.

Longmont was recently named as having the fastest Internet in the nation, thanks to its NextLight 1-gigabit-per-second municipal broadband.

All of the main cities — and even some of the smaller towns — have economic-development groups willing to assist with information and incentives for new businesses creating jobs. The groups also focus on retention to help existing businesses remain in the area.

Whether residents are at work, school or home, they love to look west to the stunning mountain backdrop. The invigorating climate attracts young, active and talented workers who are happy to live here.

Skiing and snowboarding are close by at the small resort of Eldora, west of Nederland, or an easy drive to world-class resorts such as Vail and Breckenridge. In summer, these mountains provide the perfect spots for biking and hiking.

The golf ball flies farther at this altitude, and scores of local public golf courses make for a good challenge — or a good place to entertain a business client. Recreation centers and leagues provide opportunities to play tennis, soccer, lacrosse, softball, volleyball and even adult kick-ball. Running and bicycling are hugely popular, from weekend outings to world-class competitions.

With all those outdoor activities within easy reach, the region consistently boasts one of the nation’s healthiest and fittest populations, one supported by major hospitals, numerous medical centers and some

of the world's top doctors, who move here for the lifestyle.

Many local restaurants capitalize on homegrown and organic foods to create fresh and creative meals. Several are led by award-winning, nationally known chefs. Meals often can be enjoyed outdoors, accompanied by beautiful mountain views.

With that meal, or after a long day's work, you can always sit down and relax with a locally brewed beer. Colorado is known for its quality beer, and the Boulder Valley and Northern Colorado contribute to the tradition with an ever-growing number of original brewpubs and microbreweries. Wineries and distillers of harder liquors also are beginning to make their mark.

The area provides a wide range of living options, including remote homes in the hills, single-family neighborhoods in the suburbs, senior-housing communities, mixed-use urban lofts in the cities and sprawling mansions. People love to live here, and that translates to a positive attitude at work. The area provides a quality of life similar to that of the West Coast, but at half the cost. The mountains are in your backyard, but the big city is a short drive away.

Other communities might try to copy what the Boulder Valley and Northern Colorado have to offer, but we'll stick to the real thing.

Fort Collins MSA posts highest regional GDP growth

Both the Boulder and Fort Collins MSAs recorded positive growth in GDP in 2016, while the Greeley MSA declined. Numbers are in millions of chained 2009 dollars.

Region	Real GDP, 2016	Real GDP, 2015	% growth	National rank (by percentage GDP growth)
Boulder MSA	\$21,675	\$21,333	1.6	170
Denver/Aurora/ Lakewood MSA	\$180,446	\$176,148	2.4	116
Fort Collins MSA	\$14,186	\$13,664	3.8	45
Greeley MSA	\$10,146	\$10,341	-1.9	343
Colorado	\$278,825	\$288,810	3.6	4

Note: 2014 GDP numbers have been revised.

Quick Facts about our region

BOLDER BOULDER/FORTITUDE

The Bolder Boulder 10k race has become a must-run event for tens of thousands of runners on Memorial Day, culminating at Folsom Field on the University of Colorado Boulder campus. Now, Bolder Boulder organizers have added Fortitude, a Labor Day 10k in Fort Collins, with the race ending at Colorado State University's new on-campus stadium.

Courtesy boulderbibs.com

Chad Collins, BizWest

LIFE BECOMES ART

Few areas of the country are as dedicated to the arts as Loveland, Colorado. The city is renowned for its public displays of sculptures, and its annual Sculpture in the Park show draws thousands of art collectors and sculptors.

MUSEUM OF DISCOVERY

Fort Collins' history of discovery — the city sits on the Overland Trail after all — comes to life at the Fort Collins Museum of Discovery, a hands-on history and science museum. Since opening in 2012, the museum has served more than 475,000 visitors from 45 states and 30 countries.

Courtesy Fort Collins Museum of Discovery

BICYCLING ENTERS HIGH GEAR

Abundant trails for mountain biking, bike-friendly streets and paths, many bike shops and manufacturers, and even a velodrome provide hints at the bicycling culture of the Boulder Valley and Northern Colorado. Visitors or locals can even use some innovative bike-sharing stations around the region. The velodrome is located in Erie, which straddles Boulder and Weld counties.

Rising from a secluded meadow near Red Feather is The Great Stupa of Dharmakaya, dedicated in 2001 by Boulder's Shambhala center. The Stupa stands 108 feet tall and is regarded as a significant example of sacred Buddhist architecture.

THE GREAT STUPA OF DHARMAKAYA

Courtesy Great Stupa

KEEPING IT NATURAL

This region is known for many things, but Boulder in particular is known as the center of the natural-products industry. Home-grown Celestial Seasonings still calls the city home, and many of the nation's best-known natural-and-organic brands, such as WhiteWave, Horizon Organic Dairy and Justin's, got their start locally.

CENTENNIAL INSPIRATION

James A. Michener's Centennial is well-known as a best-selling book and popular TV miniseries, but fewer people recognize that the inspiration for Centennial was actually Greeley, Colorado. Michener was a student and teacher at what is now the University of Northern Colorado in Greeley and donated many of his papers to the university. Visitors can learn about Michener and Centennial at the James A. Michener Library on the UNC campus.

Courtesy extended.unco.edu

READY FOR KICKOFF

Boulder and Northern Colorado boast some excellent athletic programs at area universities, including the Colorado State University in Fort Collins, the University of Colorado Boulder and the University of Northern Colorado in Greeley. CSU this fall dedicated its new, 41,000-capacity stadium on the main campus.

Courtesy Colorado State University

CHEERS TO BEER

Beer aficionados could find no better place to pull up a barstool than the Boulder Valley and Northern Colorado. The region boasts some of the nation's premier craft breweries. One, Greeley's WeldWerks Brewing Co., was named best new brewery in the country in 2016 by USA Today. And Fort Collins is home to one of the industry's giants, Anheuser-Busch.

Boulder

Brains, beauty lure entrepreneurs to Boulder

If anyone doubts the ability of a city with high prices and tough regulations to lure job-creating business, just Google it.

Boulderites are watching online giant Google build its 330,000-square-foot campus along 30th Street and lease even more office space, allowing the company to more than double its Colorado workforce in the past two years. Lured by an unsurpassed lifestyle and the brainpower of national laboratories and a major university, other good-paying corporations continue to knock on the door as well.

Few communities of 108,000 residents could claim as much international notoriety as Boulder. This scenic community along the Flatirons has attained a global reputation for its entrepreneurship, innovation, environmental consciousness and, yes, occasional wackiness. Check out www.keepboulderweird.com to see some of the city's more, ahem, eclectic side.

All of these elements and many more make Boulder a very special place, with an amazing quality of life that has fostered a dynamic, startup-friendly business community. Prices of homes and apartment rentals might be higher in Boulder, but that hasn't kept the city from recording one of Colorado's lowest unemployment rates.

Boulder residents work and play against a mountain backdrop that includes the iconic Flatirons and the Indian Peaks Wilderness Area. More than 30,000 students attend the University of Colorado Boulder, widely regarded as having one of the most beautiful campuses in the nation.

Boulder's unique setting and its lean, green, outdoorsy residents belie the high concentration of companies in the aerospace, bioscience, data-storage and software industries. National corporations such as IBM Corp., Ball Aero-

The city of Boulder's Economic Vitality Program supports efforts through public and private sources to help businesses grow and remain in Boulder. Incentives include a flexible tax- and fee-rebate program for primary employers, a microloan assistance program, and parks and recreation discounts for all employees in Boulder. The program provides business-assistance services and business-retention and outreach efforts.

Inspired ... Informed ... Invested *in the community*

**Boulder County's
Leader in Full Service
Commercial Real Estate**

Our team of 20 agents & management personnel work together & obtain great results!

(303) 442-1040
www.gibbonswhite.com

FOUNDED in 1986, Gibbons White continues to SHINE as the preeminent provider of commercial and investment real estate services in Boulder and beyond. Our team is inspired, informed and invested in amazing outcomes for our local, regional and institutional clients.

OUR SERVICES include commercial property and asset management, commercial owner association management, tenant representation, landlord representation, acquisitions, dispositions, investment analysis, 1031 tax deferred exchanges, and receivership services.

'LISTENING FIRST' IS ONE OF OUR STRENGTHS - we value and appreciate our client's goals and directions that lead to the development of a customized strategy for each real estate project, whether it be finding the right property, or managing their real estate asset with an eye to future value.

OUR CLIENTS tell us that we are master marketers, good negotiators, and empathetic yet effective property managers. We perform lease enforcement with a human touch and produce top notch financial accounting and reporting. Our team blends a set of talents and passions for the industry that allows us to grow together and learn from one another. Our clients are the beneficiaries of our knowledge and of our commitment for continual improvement in every area of the industry.

NOT YOUR ORDINARY ANYTHING. We know that we need to re-invent solutions to new challenges every day. The graceful art of the deal is what lights us up!

In our 32nd year, we are going strong!

BOULDER, from 12 space & Technologies Inc. and Lockheed Martin Corp. are there. Boulder also hosts professional and technical service companies and considers itself a center for alternative- and renewable-energy research and manufacturers of natural and organic products. Boulder also is regarded as the center of the nation's outdoor industry, even serving as headquarters to the Outdoor Industry Association.

Boulder's natural attributes and support from peer companies draw many entrepreneurs to the city. Here, they start and grow new businesses, attracting one of the highest rates of startup and venture-capital funding in the nation. In fact, companies in Boulder drew more venture capital, per capita, than companies in any other city in the nation, based on industry statistics. Boulder-based accelerator TechStars has brought more acclaim and recognition to the city.

These innovative companies reflect the intellectual energy found in Boulder, which is supported by CU, several major federally funded science laboratories and one of the nation's highest percentage of residents with college degrees.

CU-Boulder, the Rocky Mountain region's largest and most-comprehensive campus, offers 3,400 courses, boasts several Nobel laureates and works extensively with private businesses through its Technology Transfer Office.

Boulder's historic downtown features the Pearl Street Mall, an award-winning pedestrian shopping, dining and entertainment destination that is celebrating its 40th anniversary in 2017. More retail and restaurants can be found in the city's central corridor surrounding the Twenty Ninth Street retail district. The city has more than 400 restaurants, including several that have received national acclaim.

With a resident symphony, four museums, dozens of movie and stage theaters, numerous festivals and more than 30 art galleries, the city is a haven for culture. Boulder also offers highly ranked public and private schools, three city recreation centers and growing, high-tech hospitals.

Dynamic growth is occurring on Boulder's east side, where the Boulder Valley Regional Center and Transit Village attracts hotels, restaurants, offices, residential buildings and entertainment venues as it becomes a hub for regional rapid transit.

Just minutes away from all those urban amenities is the natural outdoors. The city owns more than 45,000 acres of mountain and plains open space, with more than 200 hiking and biking trails.

Brighton

For Brighton, growth is in the wind

Brighton’s proximity to Denver International Airport isn’t the only thing the Adams County seat has going for it. The city — whose northern edge sits firmly in Weld County — also is home to two manufacturing plants for Danish wind-turbine maker Vestas Wind Systems A/S – the company that unveiled the longest wind turbine blades ever produced in the United States – and contracts to provide blades and nacelles for new wind-energy keep coming. That means more jobs keep coming as well.

There’s even more to Brighton, however. Since its incorporation in 1887 with a population of 175, the city has hardly stopped expanding. Brighton ranks as one of Colorado’s fastest-growing communities, and not without reason.

Residents are close enough to enjoy many of the urban advantages Denver has to offer, while still having a rural retreat with a panoramic view of the mountains and easy access to Barr Lake State Park.

Despite its proximity to the state capital, Brighton has made an effort to

THE NEXT BIG THING... IT'S ALREADY HERE

BRIGHTON, COLORADO

BRIGHTONEDC.ORG

Courtesy Brighton Economic Development

distance itself from the “suburb” label, focusing in recent years on setting design standards, strengthening environmental initiatives and channeling commercial growth to specific neighborhoods.

The opening of the Prairie Center – the entrance of which is marked with a 3,000-pound bronze bald eagle with a wingspan of 20 feet – has created opportunity for retailers and consumers alike. The 2-million-square-foot center brought to town major retailers, restaurants and a Candlewood Suites. The Pavilions Shopping Center brought more stores downtown, as well as a 12-screen movieplex, the first theater built in the city since the 1970s.

Keeping up with the growth is a \$417 million wastewater treatment facility that opened in May.

Brighton has not let commercial growth go unchecked, however. The city’s “smart growth” plan was designed to protect its small town feel. It included a revitalization of downtown and protection and improvement for its quaint Main Street, an area complete with railroad tracks and old store facades.

FMC Technologies Inc. recently opened a 50,000-square-foot service and sales facility for equipment used in hydraulic fracturing. Leed Fabrication, a manufacturer of equipment for oil and gas development nationwide, employs welders, assemblers, machine operators and others.

Health care also has enhanced the city’s economy. Brighton’s \$138 million Platte Valley Medical Center has been cited as one of the nation’s top performers on key quality measures, and recently announced an affiliation with SCL Health, based in Broomfield.

ECONOMIC-DEVELOPMENT CONTACTS/ INCENTIVES

Bo Martinez, director of economic development, City and County of Broomfield
303-464-5579, bmartinez@broomfield.org

The city and county of Broomfield offers a variety of economic-development incentives for companies looking to expand or relocate. Businesses can receive up to 50 percent rebates on business personal property taxes and on sales and use taxes on building materials for buildout of space. Additionally, Broomfield can offer tax-increment financing in qualified areas of the community

Broomfield

Broomfield flying high along U.S. 36 corridor

When the Butterfly Pavilion, a major tourist attraction and educational resource that has been located in Westminster for 25 years, announced in May that it plans to move to the North Park development at Sheridan Boulevard and Colorado Highway 7 in Broomfield, it seemed to be yet another indicator that Broomfield continues to spread its wings.

Broomfield last year was ranked the fifth fastest growing city in the nation, according to the U.S. Census Bureau, and it's no wonder. From Interlocken and Arista along the booming Denver-Boulder corridor to the burgeoning area along Interstate 25 bordering Northern Colorado, this city and county boasts some of Colorado's hottest developments.

Northern Colorado-based de-

veloper McWhinney is developing North Park, 932 acres of land within the Anthem neighborhood. The developer envisions a 20- to 40-year buildout of commercial projects, including an applied research center. The residential portion of Anthem is slated to include up to 3,100 homes.

Much of the work in Broomfield is taking place at Arista, the transit-oriented mixed-use development near the southeast quadrant of U.S. Highway 36 and Wadsworth Parkway. New luxury apartments, new Class A office buildings, a new UCHealth hospital and new corporate headquarters are sprouting up in Broomfield as well.

Ranked as the Boulder Valley's third-largest city, which has the distinction of being its own county, Broomfield also houses some of the area's larg-

Courtesy City and County of Broomfield

est private-sector companies, with the majority of the region’s class A office space. Its midway location along U.S. 36 allows it to easily attract a labor force from both Boulder and Denver. The city also stretches east to access Interstate 25 and the Northwest Parkway to Denver International Airport. The Interlocken Advanced Technology Environment is the area’s primary office park, with a variety of real estate on 900 acres. It’s home to the headquarters of Level 3 Communications Inc., Vail Resorts Inc., and Webroot Software Inc. Oracle Corp. and Staples Inc. have major facilities there. The business park also includes two four-star hotels — the Omni Interlocken Resort and Renaissance Boulder Suites at FlatIron — and the Omni, a 27-hole championship golf course.

MWH Global, recently acquired by Stantec, also is headquartered in Broomfield.

FlatIron Crossing, FlatIron Marketplace and Main Street at FlatIron provide Broomfield with more than 2 million square feet of mall shopping and big-box stores, including Nordstrom, Dillard’s, Macy’s, Dick’s Sporting

Goods, Best Buy and Walmart Supercenter, and dining opportunities. Also nearby is the modern 150,000-square-foot Lakeshore Flatiron Athletic Club.

The Arista mixed-use and entertainment neighborhood features the 1stBank Center, which has a scalable capacity from 3,500 to 6,500 attendees. The surrounding neighborhood is envisioned to include 1,500 residential units, 150,000 square feet of office space, 55,000 square feet of main street retail space, 400,000 to 600,000 square feet of larger big-box retail space, a 1,500-stall parking facility, a Regional Transportation District bus rapid-transit station and numerous parks and pedestrian walkways.

The Denver metropolitan area’s second Ikea store also is planned at the intersection of I-25 and Colorado Highway 7.

Broomfield has next-door access to Rocky Mountain Metropolitan Airport in Jefferson County, with corporate jet services. The city is served by RTD bus routes and benefits from the Flatiron Flyer, the Regional Transportation District’s bus-rapid-transit system to Boulder and Denver.

Erie

Energy of several kinds propels Erie

Erie stands with its feet in two worlds, part in Boulder County and part in Weld County. That location positions the town at the forefront of battles between environmentalists and energy producers. But it also makes it an extremely attractive area for growth, with new retail and residential projects abounding.

Erie is situated in the heart of Colorado's major economic and population hubs. This town — with its close proximity to world-class research and academic institutions, and its well-educated residents (more than four in 10 hold college degrees) — is alive and thriving. Money Magazine in 2015 named the town the 13th best place to live in the country among small communities.

Located just west of Interstate 25, Erie hosts the Boulder Valley Velodrome, a facility attractive to athletes of all levels, including Olympic-level cyclists. Erie, which likes to cultivate its community-centric, small-town feel, also boasts an award-winning community center, 20,000-square-foot library, new schools and scenic trails.

New developments are sprouting along Colorado Highway 7 at Sheridan Parkway, at “Nine Mile Corner” near U.S. Highway 287 and Arapahoe Road, and the Four Corners mixed-use development at County Line Road and Erie Parkway.

The town's “Fire Station to Brewpub Civic Building Reuse Project” is a public/private partnership that is serving as a catalyst for further retail business development in the historic downtown area.

Energy plays an ever-increasing role in Erie's economy and atmosphere. Oil and gas extraction companies receive a fair amount of pushback from Erie residents over drilling in the area, but work to reach agreements with the town that govern their operations.

According to the town, Erie also is committed to sustainability. Eco-friendly civic development and environmentally “green” practices include a town-wide interconnecting trail system, a water-saving irrigation system in its public parks and a thermal solar system installation at the Erie Community Center. Erie Community Park, a 41-acre “green” area, was opened in 2010.

Erie's major employers include the Boulder Valley School District with 4,000 employees.

Regional Transportation District bus routes connect Erie with Boulder, Broomfield, Lafayette, and Louisville. Erie Municipal Airport, a general-aviation facility owned and operated by the town, is located three miles south of the central business district. With its single, 4,800-foot paved runway, the airport handles about 9,000 operations a year. The airport has 200 hangars, which house 250 airplanes, the majority of which are single-engine piston planes, as well as a dozen twin-engine planes, seven helicopters and a medical-emergency helicopter.

Evans

City south of Greeley touts its own identity

Evans bears a proud name, a fascinating history and a bright future.

Butting up against the southern edge of Greeley, Evans often is lumped in with its larger neighbor to the north as part of the “Greeley-Evans” metroplex. But the city — named for the second territorial governor of Colorado, John Evans — maintains a fierce independence and an intense drive for progress.

Evans was founded in 1867 and was the county’s first town, incorporated before Nathan Meeker helped establish Greeley.

“In 1871 the St. Louis-Western Colony brought 400 people to settle the area,” according to the Evans Area Chamber of Commerce website. “Evans became a supply town and highway stop, known for its rowdy lifestyle in comparison to the temperance colony of Greeley. It was known as the ‘Queen City of the Platte.’ It was briefly the county seat of Weld County until a party of raiders from Greeley stole the county records and burned the courthouse.”

Today, Evans boasts a growing base of industry. It benefited from oil and gas exploration, with many energy producers and affiliated companies setting up shop in the city.

Evans has been working on two major economic-development projects, one focused on the city’s historic old town and the other aimed at revitalizing and beautifying the U.S. Highway 85 corridor leading into the city. It’s also working on a \$14 million to \$16 million project to rebuild a park inundated by the September 2013 flood so that it meets Federal Emergency Management Agency and Environmental Protection Agency requirements.

At the corner of 31st Street and U.S. 85, Kum and Go opened the first of a uniquely designed store for that company.

Evans also has attracted many housing developments, including the 430-acre Tuscany subdivision along 37th Street.

In June 2015, Montreal-based ROI Land Investments Ltd., a diversified real estate investment company, acquired 220 acres of land and water rights in Evans, intending to develop 1,200 lots for single-family homes, townhomes, duplexes, triplexes and condos. The city continues to work with ROI on that project.

Despite Evans’ independence, the city has fostered good relations with its larger neighbor to the north. Both cities consummated a revenue-sharing agreement for a retail district in 1980 to resolve an annexation dispute. The two cities operate a joint bus system, Greeley-Evans Transit, known as GET.

Evans’ school district merged with Greeley’s in 1962, establishing Greeley-Evans School District 6. Prairie Heights Middle School opened in September 2015. This newest edition to the district offers a unique design of grade “pods” to facilitate same-grade interaction and collaboration in the learning process.

Courtesy Jeffrey Beall, City of Evans

Fort Collins

More businesses, residents choose NoCo's biggest city

Chad Collins for BizWest

You don't hear it called the Choice City much anymore, but Fort Collins still is living up to the nickname. Located just 60 miles north of Denver along Interstate 25, the Larimer County seat offers choices in education and employment, restaurants and retail, health care and housing, arts and entertainment.

These opportunities have helped transform the city into one of the nation's entrepreneurial hotbeds, luring high-tech companies, craft breweries and many other startups.

Helping drive the city's appeal is Colorado State University, with programs in engineering, energy research, business, veterinary sciences, bioscience and other disciplines. The Veterinary Teaching Hospital is regarded as one of the top such programs in the country.

CSU works closely with federal laboratories, several of which are located in Fort Collins. The Centers for Disease Control and Prevention's Division of Vector-Borne Infectious Diseases is located in Fort Collins and offers research into dengue fever, Lyme disease, West Nile virus and other ailments.

CSU also operates the Rocky Mountain Regional Biocontainment Laboratory on the university's Foothills Research Campus, and the \$220 million on-campus football stadium that opened this year is the most visible part of the university's massive, billion-dollar building boom.

FORT COLLINS, from 22

The federal government also maintains a significant presence in the area, including the National Seed Storage Laboratory, a visitor center for the Arapaho-Roosevelt National Forest, National Wildlife Research Center and the National Institute of Standards and Technology, to name a few.

Fueled by a highly educated workforce, Fort Collins hosts operations of some of the largest technology companies in the United States, including Hewlett-Packard Co., Avago Technologies Inc., Advanced Micro Devices Inc., Intel Corp. and many others.

Energy is another of the city's prominent sectors. Advanced Energy Industries Inc. (a Fort Collins-birthered company) and

Woodward Co., which is developing its new campus in the northeast part of the city, are both headquartered locally.

Otter Products LLC, one of Fort Collins' biggest success stories, is expanding its footprint downtown. An innovator of protective cases for handheld-device manufacturers, wireless carriers and distributors, it started as a small venture in 1998 and now is one of the fastest-growing privately owned companies in the nation.

The Northern Colorado Economic Alliance supports existing employers and recruits new ones to the city and region. Innosphere, an engine for job creation, showcases area startups, and acts as a catalyst for entrepreneurship,

Please see FORT COLLINS, page 25

Images by Chad Collins for BizWest

FORT COLLINS, from 24 providing programs and services to scientific and technology-based ventures, as well as network opportunities for its clients.

Fort Collins' craft beer culture supports more than a score of microbreweries and brewpubs; the largest remains New Belgium Brewing Co., with a growing national distribution network. The city is also home to the largest brewer in the world, Anheuser-Busch. Each June, Fort Collins hosts The Colorado Brewer's Festival, which averages around 30,000 attendees.

Along with the beer, Fort Collins' social culture thrives on its local music scene. Summers are filled with festivals, many

of which are hosted by the Downtown Business Association. NewWestFest, the season's main attraction, features three days of live music, local cuisine, art and merchant booths — and lots of people watching. Lincoln Center is home to the Fort Collins Symphony Orchestra and also attracts national touring companies of Broadway plays, comedians and speakers and the annual Tri Media Film Festival. The newest addition is a Music District developed by the Fort Collins-based Bohemian Foundation as a hub for musicians, music-related businesses and nonprofits.

A newly renovated plaza anchors the city's popular Old Town district, which soon will boast a new hotel.

Greeley

‘Unexpected’ now the norm as Weld city stays in the loop

Who knew that downtown Greeley has one of the region’s most-vibrant live-music scenes? Or that thousands of people flock to the annual Greeley Blues Jam? Or that the city is becoming a center of the agricultural-technology industry?

And who could have guessed that the city could fit into Tesla chief executive Elon Musk’s plans for a futuristic, high-speed “hyperloop” transportation system?

These facts and many more reflect the idea behind the “Greeley Unexpected” initiative, whereby civic boosters seek to inform the public about the city that traditionally has been regarded with more limited views.

Greeley, which has surpassed 100,000 population, has worked to shed its image of feedlots, beef processing and oil, thanks to work by the initiative launched by the city, the Greeley Chamber of Commerce, the University of Northern Colorado, Aims Community College and other groups. The campaign seeks to highlight the people, events and other factors that “make the city an interesting place to live, work, play and learn.”

Weathering a decline in oil and gas exploration, Greeley and Weld County score high in rankings of employment, population and wage growth, buoyed by construction and meatpacking — Weld County scores high in rankings of employment, population and wage growth. Nearly one in three local jobs are related

Chad Collins for BizWest

to agriculture in one way or another, contributing more than \$1 billion to the local economy. Weld County ranks in the nation's top five for agricultural products sold, and is first in livestock, lamb and poultry.

But wait. There's more.

The Greeley Public Art Master Plan helps the city fund, select, display and maintain public art. Union Colony Civic Center, which opened in 1988 and includes the 1,690-seat Monfort Concert Hall, the 214-seat Hensel Phelps Theater and the Tointon Gallery, regularly brings Broadway musicals, concerts, dance and comedy shows. In its 11th year, the two-day Greeley Blues Jam brings blues concerts to downtown Greeley and Island Grove Regional Events Center. The downtown concerts are in many bars and restaurants.

Denver-based Providence Hospitality Partners has been hired to operate the Lincoln Park Hotel and Conference Center in downtown Greeley that is being developed by a group of prominent Greeley businessmen. The 147-room DoubleTree by Hilton hotel at 919 Seventh St. rises on property owned by the city of Greeley; the six-story structure is on the east half of the property, which also includes a pool and a full-service restaurant. That tower structure is attached to the convention center, which anchors the west side of the property and faces Union Colony Civic Center. The conference center will have 14,000 square feet of meeting space, which includes a 12,000-square-foot ballroom.

A number of community organizations, including the Downtown Development Authority, Small Business Development Center and Upstate Colorado Economic Development, all play a role in the health of Greeley's business sector.

Upstate, a Greeley-based agency that works to foster business growth in Weld County, targets the industry clusters that have largely led to the city's growth in recent years, including energy, food processing, information technology/software and manufacturing. Upstate's efforts are bolstered by the city of Greeley's Economic Development program. The newer Northern Colorado Economic Alliance also seeks to boost the regional economy.

The downtown area has undergone many redevelopment efforts in the past few years, with more plans in the works by the Downtown Development Authority to boost retail spending and encourage multi-family housing in the area. The Go-Cup district, added to the Ninth Street Plaza, is the first Common Consumption Area in Colorado.

The University of Northern Colorado, with an enrollment of more than 10,000, is renowned for its programs to train nurses and teachers, as well as the Monfort College of Business. Aims Community College works closely with local employers to tailor courses for their needs. The Institute of Business & Medical Careers, which expanded to Greeley in 2008, offers accelerated career training in business and medicine.

Banner Health's North Colorado Medical Center soon will be joined by a UHealth hospital and medical center, a \$185 million project that will be built in phases.

But Greeley's history with cowboys still shapes its landscape. It is home to one of the nation's largest rodeos — the Greeley Stampede.

Johnstown

Johnstown continues growth with retail, office, residential projects

Johnstown has emerged as a go-to city in Northern Colorado. Recent developments include the 250,000-square-foot Scheels sporting-goods store in the 2534 development at Interstate 25 and U.S. Highway 34, along with other office, hotel and retail projects.

One recently announced development is the Villages at Johnstown, a mixed-use project that will include industrial, commercial (hotel, retail gas stations, office and medical) and residential uses.

Scottsdale, Ariz.-based Caliber — The Wealth Development Co. and partner John Rosso of Westar Development have acquired a 256-acre parcel at the southeast quadrant of Interstate 25 and Colorado Highway 402 for the project.

The multi-stage development will begin with a 100-acre industrial park, timed to coincide with a Colorado Department of Transportation expansion of the interstate from two to three lanes in each direction. Once the interstate expansion is complete, Caliber will begin work on the commercial and retail component. Residential will constitute the final phase, providing moderate and middle-income multifamily and single-family housing.

Indeed, families are finding Johnstown, as the city attracts commuters looking to buy an affordable first home and empty nesters wanting to downsize. Johnstown, situated along I-25 and stretching from Colorado Highway 60 to Highway 34, spent recent years annexing parcels of real estate to become a prime Northern Colorado location.

Johnstown's downtown business district supports the economic culture of Johnstown. A significant amount of cottage industry and agriculture, the growing business district in the north 2534 development, and the Gateway Center east of I-25 also impact this growing community.

Johnstown is also home to Northern Colorado Rehabilitation Hospital, the only freestanding rehab hospital in the region; the Northern Colorado Long Term Acute Hospital; and Clear View Behavioral Health, a mental-health facility.

Lafayette

Small-town ambiance amid county's growth

Maintaining a small-town feel in the midst of mounting pressures for rapid growth is not easy, but the town of Lafayette in eastern Boulder County has done just that.

Lafayette boasts a variety of single-family neighborhoods surrounded by parks, along with a Hale Irwin-designed public golf course. A farm stand grows fresh produce on an open-space parcel. The town's main street, South Public Road, is lined with locally owned shops and restaurants, and plays host to annual festivals including the Quaker Oatmeal Festival, the Summer Fun Fest, Peach Fest, Celebrate Lafayette and Home for the Holidays.

A revitalization effort is under way on downtown's East Simpson Street, one of the town's historic hubs.

The city has created an active transportation map to illustrate bicycle and pedestrian routes throughout the city to get residents from point A to point B in a safe manner or a more direct route. The map not only helps guide people through town but also is an information piece that shows people the fastest and safest route to get across town.

Located at the crossroads of Colorado Highway 7, U.S. Highway 287 and the Northwest Parkway, the city continues to attract commercial growth.

Boulder Community Health is partnering with Albuquerque, N.M.-based Ernest Health Inc. to build a free-standing 40-bed rehabilitation hospital in Lafayette. The sprawling, full-service Good Samaritan Medical Center has generated more development around it — including plans for hotels, retail, restaurants and medical offices on the nearby SoLa tract.

Lafayette's efforts to lure businesses from more expensive nearby venues also is paying off. For instance, software-development training firm DevelopIntelligence LLC bought a building in Lafayette for \$2.05 million and moved there from Boulder in January.

Class A office space often sought after by companies is available throughout the city, including at the Creekside Offices at Old Laramie Trail. The distinctive 8,500- and 4,500-square-foot buildings feature natural stone, glass and vaulted roofs in a Colorado ski-lodge style. On the east side of the city, Vista Business Park has space for industrial and flex office buildings. Lafayette's Corporate Campus 119-acre office park is home to some of its most well-known employers, from Kaiser Permanente to Thermo Fisher Scientific Inc. Offices of Epsilon and Meretek Diagnostics Inc. also are located there. The Lafayette Tech Center, a 59-acre office and industrial park, has more regional heavy-hitter companies, from the U.S. office of Lafuma Corp. to Sporian Microsystems Inc.

Lafayette looks forward to transit-oriented development as well, encouraging the Regional Transportation District to sharpen its focus on its northwest corridor.

ECONOMIC-DEVELOPMENT CONTACTS/ INCENTIVES

Jessica Erickson, president, Longmont Economic Development Partnership
303-651-0128, jessica@longmont.org

The city of Longmont offers a variety of business incentives for new and expanding companies.

Companies can recover 30 percent in building-permit fees and 50 percent of personal-property taxes; avoid the first two years of sales and use taxes on research and development equipment, with the option of an additional three-year rebate on these taxes; enjoy a permanent exemption on sales and use taxes for manufacturing equipment; take advantage of expedited permitting; and gain development-density bonuses. The city may also help developments with establishing tax-increment financing

Longmont

City getting attention at ever-higher speed

With its new NextLight municipal broadband service getting national attention by offering 1-gigabyte speeds for businesses and residents, Longmont is kicking development into high gear.

The city has become one of the main hubs for computer and data storage in the United States. Hard-drive makers have a significant presence in Longmont, along with more than 20 other information-technology hardware companies. Longmont also has several industry clusters with employment exceeding 500, including software, biotechnology, business services, semiconductors and food processing. It has realized a data-center concentration in recent years and hosts numerous national firms.

Technology companies, especially startups, favor Longmont for its educated workforce, economic incentives, and lower real estate prices and electric rates. AstraZeneca acquired Amgen Inc.'s campus last fall for \$64.5 million.

Meanwhile, breweries tap the city's thirst for fun. (Ever heard of Left Hand Brewing Co. or Oskar Blues Brewery?)

A decision in 2016 by the Longmont Area Economic Council to change the last word in its name to

“Partnership” symbolizes the city's more comprehensive, collaborative strategy for luring business and including more segments of the populace in the benefits of growth.

Longmont is embracing that mission by enhancing its business-friendly climate while still celebrating its proximity to the entrepreneurial hotbed of Boulder, the rest of the Denver metropolitan area, the rapidly growing communities of Northern Colorado and Rocky Mountain National Park.

Longmont's economic-development team focuses on attracting primary jobs to the city — or companies whose products and services are sold outside the area. This brings outside dollars to Longmont to help fuel prosperity.

One of the city's economic-development slogans has been, “Longmont is where ideas become products.” The city offers a variety of business incentives for new and expanding companies. Companies can recover 30 percent in building permit fees, 50 percent of personal property taxes, avoid the first two years of sales and use taxes on research and development equipment, with the option of an additional three-year rebate on these taxes, enjoy a permanent exemption on sales and use taxes for manufactur-

Chad Collins for BizWest

ing equipment, take advantage of expedited permitting and gain development-density bonuses.

Real estate prices — both commercial and residential — can be less than half of prices in nearby Boulder. This allows businesses and families to live and work affordably in Longmont.

Longmont provides its residents with plenty of retail options, including downtown Main Street shopping and big-box stores such as Walmart, Target, Best Buy, Home Depot and Lowe’s spread throughout the city.

The former Twin Peaks Mall has been replaced by Village at the Peaks. The Longmont City Council voted to use a financing tool

that uses city property as collateral to come up with its part of the public-private partnership to help develop the new retail area.

The city has its own recreation center, live theaters, one private and three public golf courses, and an outdoor sports complex at Sandstone.

Longmont United Hospital, part of the Centura Health family, has a full range of top-ranked medical care. University of Colorado Health also has entered the Longmont market, purchasing Longmont Clinic and building a new hospital of its own at Colorado Highway 119 and County Line Road. That facility was completed in August and was slated to be fully operational by September.

The St. Vrain Valley School District provides kindergarten through 12th-grade public education throughout the city, and Front Range Community College’s Boulder County campus is based there. Longmont has Regional Transportation District bus service, with local routes as well as regional connections to Boulder and Denver, and eventually may be served by its FasTracks commuter-rail service. FLEX buses connect Longmont and RTD commuters with Berthoud, Loveland and Fort Collins.

LONGMONT

THE RIGHT LOCATION:

It’s a critical component to your company’s success. Where does your company belong?

- Where innovation thrives
- Where you can find the talent you need
- Where there’s a strong business environment that fosters growth
- Where costs are affordable
- Where the environment and lifestyle is what your employees desire

Few places in the U.S. check all these boxes like **LONGMONT, COLORADO!**

Longmont is a community of 90,000 located in Boulder County with more than 200 primary businesses. Longmont offers a competitive business climate, access to the most highly educated workforce in the country, affordable utilities, including a citywide gigabit fiber network, an innovative school district committed to developing a 22nd century workforce, and the Longmont EDP, an organization dedicated to ensuring the success of your site selection process.

Louisville

Louisville's allure continues to impress

The Louisville-based space systems division of Sierra Nevada Corp. has big dreams for the Dream Chaser, a reusable orbital spacecraft.

The vehicle is just one of many dreams the thriving town in southern Boulder County is seeing come true.

Among the visible signs: New shops are popping up downtown, redevelopment projects abound throughout the city, and a public-private partnership is remaking the face of Centennial Parkway.

Louisville often scores high in annual rankings of the best places to live in the nation, thanks to an allure that has been built on a foundation of quality housing, proximity to Boulder or Denver via U.S. Highway 36 and Denver International Airport via the Northwest Parkway. It's also a great place to do business in its own right.

The town last year was ranked seventh among small towns in the United States by Livability.com. According to the Livability analysis, "Louisville is home to good schools, small-town charm and an abundance of outdoor recreation options. Neighborhoods in Louisville feature wide, winding streets and most are an easy walk to a park or open space, while the town's infrastructure makes it easy to walk or bike to your destination. Louisville's Main Street is lined with historic architecture, a variety of small businesses and shops, and locally owned restaurants."

The city has two major business parks, with a range of buildings for high-end corporate use to research and development industrial operations. Both parks have room to grow.

The Colorado Technology Center and Centennial Valley Business Park are home to a variety of small and large businesses, and developers continue to help build them out.

Louisville also serves as headquarters for notable companies such as Gaia Inc., RGS Energy, GHX and many others.

Louisville has a historic downtown, with shops, unique restaurants and quality office space, and is seeing several redevelopment projects there.

There are nearly 8,000 households in Louisville through a mix of mostly single-family neighborhoods.

Louisville offers its residents a variety of retail opportunities — from locally owned shops and restaurants on Main Street to big-box retailers such as Lowe's and Kohl's along the McCaslin and South Boulder Road corridors.

Louisville has its own recreation center, sports leagues, dog park and the 18-hole Coal Creek Golf Course. The city also is home to one of four hospitals in the Boulder Valley — Avista Adventist Hospital.

Alfalfa's Market specializes in natural and organic products. The store in Louisville was built from the ground up and occupies the anchor position in the Center Court Village shopping center at South Boulder Road and Centennial Drive.

City of Louisville
303-335-4531, AaronD@LouisvilleCO.gov

The city of Louisville customizes business assistance to the needs of the company. Forms of assistance may include permit-fee rebates, construction-use-tax rebates, and sales-tax rebates. All rebates are based on new dollars generated by the project at move-in and/or during the first three to five years of operation. Assistance is based on need, high-quality development, retaining jobs, creating new jobs with average salaries above the city average, retaining existing sales tax, creating new sales tax, bringing industry or retail diversity, or using an existing building.

THE BUSINESS JOURNAL OF THE BOULDER VALLEY
AND NORTHERN COLORADO

Loveland

New life at heart of 'Sweetheart City'

Chad Collins for BizWest

Loveland and business enjoy a long-term romance. The self-proclaimed “Sweetheart City” is experiencing a boom, with new retail and office developments, residential projects and a continuing commitment to the arts.

Known for a culture largely driven by the arts, Loveland has poured money and time into renovating its downtown, supporting local business and convincing Rocky Mountain National Park tourists that this city “on the way up” is worth more than a brief visit or a pass-through.

Part of that downtown revival is embodied by the largest redevelopment effort in its history: the \$76 million Foundry project, which is transforming three city blocks into a movie theater, apartments, offices, retailers and parking as part of a renewal plan originally called “South Catalyst” and built in partnership with Brinkman Partners of Fort Collins and Boulder-based OZ Architecture.

In an equal partnership between the city and a private developer, The Rialto Bridge Project included an expansion and renovation of the city’s historic Rialto Theater. With the purchase of two buildings to the west, the theater was expanded to a 20,000-square-foot, three-story, full-fledged performing arts center, complete with a restaurant, offices for rent and a community meeting room.

Numerous other downtown Loveland buildings have undergone renovation, including the historic Arcadia Hotel at Fourth Street and Cleveland Avenue.

Loveland’s fastest-growing industry is health care, with McKee Medical Center and the Medical Center of the Rockies topping the city’s employment charts.

A remodeled and expanded library, expanded city center, posh new apartment buildings, a museum renovation and the revitalization of several business facades are just a few examples of the facelift the city is undertaking.

The thriving Promenade Shops at Centerra, a proposed redevelopment of the Ranch fairgrounds and events complex, and the promise of more development along the Interstate 25 corridor have boosted Loveland’s economic momentum.

Go NoCO, a nonprofit created by government entities and private businesses in Northern Colorado, secured \$86.1 million through the Regional Tourism Act of 2009 to help jumpstart four projects including two on the I-25 corridor: the Indoor Waterpark Resort of the Rockies and the U.S. Whitewater Adventure Park in Loveland.

The city also is home to Madwire, one of Northern Colorado’s fastest-growing companies, and Meyer Natural Foods LLC, a natural-beef company.

Loveland’s business community is diverse, including Hach Co., developing water-testing equipment; Group Publishing Inc., a publisher of ministry resources for Christian churches; Agrium Inc., which provides fertilizer products for agriculture; Heska Corp., which develops veterinary pharmaceuticals; and a large Wal-Mart Stores Inc. distribution center.

It helps that Loveland is near the epicenter of the state’s Higher-Education Triangle, with the University of Northern Colorado to the east, Colorado State University to the north and the University of Colorado Boulder to the south, all less than an hour’s drive away. According to the most recent figures, 32 percent of Loveland’s population ages 25 and older holds a bachelor’s degree or higher level of education.

Loveland also is home to The Colorado Eagles, a minor-league professional hockey franchise that plays at the Budweiser Events Center.

Art is still one of Loveland’s top draws. The annual Loveland Sculpture Invitational brings hundreds of artists from all over the world to show and sell their artwork, and the city is home to numerous galleries, extensive public art displays and local foundries.

COLT buses provide transportation on three routes within the city, FLEX intercity routes connect it with Fort Collins, Berthoud, Longmont and Boulder, and the Colorado Department of Transportation’s Bustang route provides a quick link to Denver, Colorado Springs and mountain recreation areas.

NATIONS NO. 1 BOOMTOWN 2015

SMARTASSET

Windsor

Business, industry continue to drive Windsor growth

Windsor's story just keeps growing.

The town has emerged as the top submarket in Northern Colorado for new-home starts, according to MetroStudy.

Ground will be broken this fall on the \$225 million Rocky Mountain Sports Park that could draw baseball and softball teams from around the world.

The 25-acre East Pointe Neighborhood Centre will bring new retail to the corner of Colorado Highways 392 and 257.

Columbine Health is adding a 45-bed skilled nursing facility and 45 independent-living apartments at its Windsor campus.

The town and Weld County have agreed on shared development standards.

Windsor has been the poster child for growth in Northern Colorado, straddling the Larimer/Weld county line and embracing a diverse base of industries. Combining small-town charm with consistent growth, this town located about halfway between Fort Collins and Greeley has become the region's boomtown, doubling its population in the past decade and projected to double again in the next.

Windsor boasts one of the region's largest residential developments, the 1,500-acre Water Valley master-planned community. Water Valley includes the 27-home semi-private Pelican Lakes golf course, which features more shoreline than any other golf course in the United States.

Go NoCO, a nonprofit created by government entities and private businesses in Northern Colorado, secured \$86.1 million through the Regional Tourism Act of 2009, which allows the rebating of state sales-tax revenue that new, out-of-state visitors would generate in a predetermined zone. Included would be a four-star, 300-room PeliGrande Resort and Conference Center,

As with many Colorado communities, recreation and culture play a key role in Windsor. The Parks, Recreation & Culture Department maintains more than 200 acres of parks, sports fields and open space, 40 miles of trails, a skate park, a beach and boat launch on Windsor Lake, summer concerts, a German heritage celebration, a fine arts festival and a public art program. Three golf courses are located in the town.

The leading industries in Windsor are diverse. Vestas Wind Systems, the town's largest employer, has been adding jobs in Windsor and Brighton as contracts come in for wind-turbine projects. Vestas, along with Kodak Alaris Inc., CareStream Health, Owens-Illinois Inc., Halliburton Co., Hexcel Corp., Cargill, Front Range Energy LLC and other companies are located in the Great Western Industrial Park, a 3,000-acre, rail-served park zoned for heavy industry. The park is owned by The Great Western Development Co., an affiliate of The Broe Group of Denver.

Poudre Valley Health System and Banner Health lend to Windsor's economic viability.

Windsor also stays true to its farming roots. Weld County has the strongest dairy growth in the state, enough to incentivize Dairy Farmers of America to open a Windsor office.

Aerospace

Colorado aerospace sees growth from large corporations, small businesses

Colorado has the country's third-largest aerospace economy.

Eight of the top aerospace contractors — including Ball Aerospace, Boeing, Northrop Grumman and Lockheed Martin — have significant operations in the state with more than 400 companies and suppliers in the state.

There are more than 188,000 jobs in the industry with an annual payroll of \$3.4 billion. It is the second in the nation for per capita aerospace workers.

Many of the major players in the industry have made significant moves in 2017.

Ball Aerospace & Technologies Corp. partnered with NASA to build a cryostat, which will be launched in 2021 from Antarctica to collect and study space dust. Ball is also working with the University of Colorado through a five-year agreement to create a talent pipeline between the university and the company.

The university has continued to grow its aerospace programs. In November, it will start construction on an \$82.5 million aerospace-engineering building. The 139,000 square-foot building will include an indoor flight test environment for unmanned aerial systems. Lockheed Martin helped sponsor the building, expected to be completed by July 2019.

CU Boulder students also worked with SpaceX to launch two science experiments to the International Space Station, both of which would be used to help develop healthcare technology back on Earth.

Sierra Nevada Corp. added an additional 101,000 square feet to its operations, leasing out space in Louisville's Colorado Technology Center. The company also plans to add 400 workers.

It's not just the biggest aerospace companies that have been seeing success.

Longmont-based Rocco LLC, signed a leasing agreement with the Air Force Research Laboratory. The company will lease patents from the Air Force to develop ultra-durable solar panels that can be used on spacecraft.

And NASA granted Boulder's Black Swift Technologies a contract to develop a drone that could be used to explore volcanoes. That research in turn will be used to improve air traffic management systems and improve the accuracy of ashfall measurements.

COURTESY NASA

EnergSys Advanced Systems in Longmont will produce lithium-ion batteries that will power the Orion spacecraft to Mars and other destinations.

Agriculture

Low commodity prices harm ag producers

Dropping commodity prices continue to hamper what has been a booming agriculture industry in Northern Colorado for nearly a decade.

Weld County has been at the forefront as the state's leading producer of beef cattle, sugar beets, grain and dairy, but the number of farms in Colorado continues to decline.

In 2016, 33,800 farms were operating, down from 34,200 in 2015 and 35,000 in 2014, according to the USDA's National Agricultural Statistics Service in cooperation with Colorado Department of Agriculture.

The state generates \$41 billion worth of economic activity as a result of its agricultural industry, which employs more than 170,000.

But the numbers are dropping for income generated by farmers and ranchers. The 2017 forecast for Colorado's net farm and ranch income shows a drop from \$444 million in 2016 to \$392 million. The 2016 numbers already were down from \$1.3 billion in 2015, according to the Colorado Department of Agriculture estimating team. The record high came in 2011, with a net farm income of \$1.8 billion.

In Northern Colorado, the agricultural landscape continues to evolve among larger players.

Meyer Natural Foods, the nation's largest supplier of natural and organic beef, built a 33,000-square-foot facility in Loveland in September 2016 and subsequently moved its headquarters there from Montana.

Colorado Premium Foods is adding 18,000 square feet of office and

refrigerated storage space at its meat-processing and packing plant in Greeley.

Denver-based Leprino Foods Co., a maker of cheese and whey products is adding to its operations in Greeley with a third phase of a buildout that will give it an 880,000-square-foot plant at 1302 1st Ave. in Greeley. The third phase caps the development project that was started in 2010.

JBS SA, the Brazil-based parent company of JBS USA in Greeley, in June said it plans to sell its Five Rivers Cattle Feeding LLC as part of a \$1.8 billion divestment plan to allow the company to reduce debt following a bribery scandal that has rocked the business.

Five Rivers has a combined feeding capacity of more than 980,000 head of cattle at 12 feedlots and farms in Colorado, Kansas, Oklahoma, Texas, Arizona and Idaho. In Colorado, Five Rivers has four feedlots: Gilcrest Feedlot in LaSalle, Kuner Feedlot in Kersey, Yuma Feedlot in Yuma and Colorado JBS owns a controlling interest in Greeley-based Pilgrim's Pride, the second-largest chicken processor in the world.

Banking

Deposits top \$21.4B for region's banks

Banks in the Boulder Valley and Northern Colorado continue to take in more deposits each year, a sign of strength, and a reason new players have moved into the market.

Some existing banks are merging or acquiring competitors amid the competition and others are implementing expansion plans in an aggressive attempt to capture a larger share of the region's strengthening market.

Banks in Boulder County had \$9.3 billion in deposits as of June 30, 2016, up from \$8.5 billion in 2015, and \$7.7 billion in 2014, according to the most recent statistics gathered by the Federal Deposit Insurance Corp.

Increased deposits were also logged from 2015 to 2016 by banks in Broomfield, Larimer and Weld counties, which round out the

region. Deposits at banks in Larimer increased from \$6.9 billion to \$7.3 billion; in Weld, they increased from \$3.4 billion to \$3.5 billion; and in Broomfield, they increased from \$1.2 billion to \$1.3 billion.

Jobs have been on the increase, causing some businesses to expand and require commercial construction loans, and homebuilders have been picking up the pace, creating a need for homebuyers to take out mortgage loans.

Residential lending has been a steady source of activity for area banks. Low home inventory has slowed some home-buying activity, though the market in the area is still very active. Slightly higher interest rates have also applied downward pressure on refinancing activity.

Significant mergers in the past 12 months include Guaranty Bank/Home State Bank; Centennial Bank/Citywide Banks; Sunflower Financial/Strategic Growth Bancorp., dba as First National Denver in Colorado.

Credit unions were merging as well: Warren Federal Credit Union/Community Financial Credit Union and Premier Members Federal Credit Union/Boulder Valley Credit Union.

New arrivals to the market include Capital One and Alpine Bank.

The U.S. Small Business Administration set a record for lending in Colorado for its fiscal year that ended Sept. 30, 2016, approving 1,996 guaranteed loans worth \$826.7 million, surpassing the previous year's record level by 242 loans and \$126 million.

Unique approach = Unique ideas

Want a bank that operates different than the others?

The foundation of our culture rests on a simple concept: *Our customer's bottom line is just as important as our own.* It's not a unique idea to us, but we understand it's unique within our industry. We're not publicly traded- we don't have to answer to "profit at all costs" motives. We focus on your success, and we tailor solutions. There's nothing cookie-cutter about us.

What else makes us unique? Our community bankers are involved in decisions & underwriting. They're not just "processors" with important-sounding titles. Why do we empower our bankers? Because we expect them to be partners & advocates for our clients. **That's what happens when you put relationships first.**

Bioscience

Bioscience employs 30,000 statewide

Bioscience is a major industry in Colorado, with 725 companies located in the state, according to the Colorado Bioscience Association.

Colorado employs 30,000 people in the industry, spanning agriculture, biotechnology, digital health, medical-device and pharmaceutical companies. There's a annual payroll of about \$2.8 billion.

Since 2012, Colorado bioscience companies have received more than \$1 billion in venture capital.

Several bioscience companies in the Boulder Valley and Northern Colorado have gone through a series of mergers and acquisitions.

Boulder-based PanTheryx Inc. acquired two companies, Phoenix's APS BioGroup and Bellingham, Wash.-based LaBelle Associates.

MiRagen Therapeutics Inc. merged with publicly traded California company Signal Genetics Inc.. The companies began trading on the Nasdaq under the ticker "MGEN."

Nivalis Therapeutics Inc. also had a merger, after it slashed 25 jobs and parted ways with its CEO and chief medical officer in January. Just before cleanout, the company announced that it

was mulling over a sale and other strategic alternatives. In April it announced that it was merging with Alpine Immune Sciences, with Alpine stockholders owning three-fourths of the combined company.

While some companies went for mergers and acquisitions, other have seen success through strategic partnerships.

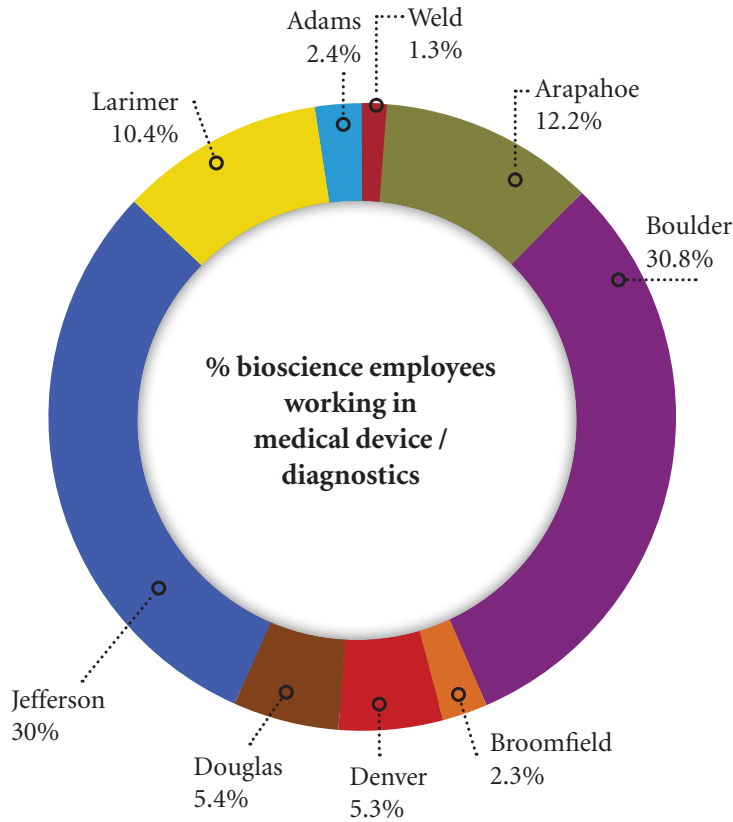

Biodesix Inc. is partnering with a Chinese company for development and commercialization of its blood tests in China. The company also has partners to do the same in Israel and India.

Array BioPharma Inc. is partnering with Merck to collaborate on a clinical trial, combining two of their drugs to test on patients with colorectal cancer. The company also partnered with a genetics firm, Amgen, to collaborate on drugs for autoimmune disorders.

For some companies, those clinical tests are paying off. Fort Collins-based VetDC Inc. got drug approval for its treatment of lymphoma in dogs.

Clovis Oncology's stock was buoyed by successful tests in its treatment for platinum-sensitive ovarian cancer. Because of that success, the company was able to launch a \$300 million public stock offering.

Education

Higher ed contributes billions to state, local economies

Chad Collins, BizWest

Institutions of higher education contribute billions of dollars to the Colorado economy, with the Boulder Valley and Northern Colorado hosting the state's flagship institutions, including Colorado State University in Fort Collins, the University of Colorado Boulder and the University of Northern Colorado in Greeley.

Additionally, Aims Community College, based in Greeley, boasts campuses in Greeley, Fort Lupton, Loveland and Windsor. Front Range Community College maintains campuses in Fort Collins and Longmont.

The latest Economic Impact Study prepared by the Business Research Division of the Leeds School of Business at the University of Colorado Boulder found that four University of Colorado campuses generated a total economic impact in Colorado of \$12.35 billion in fiscal year 2016, including direct expenditures of \$8.3 billion.

The study, released in September 2017, examined the impact of campuses in Boulder, Denver and Colorado Springs, as well as the Anschutz Medical Campus in Aurora.

The university system directly employed 32,386 faculty, staff and student workers, making it the second-largest employer in Colorado. Direct and supported employment totaled 53,442, with 24,662 employed at the Boulder campus.

CU enrolled 61,016 students in 2015 and awarded 14,479 degrees in fiscal year 2016.

The university generated \$3.5 billion in non-capital revenues in 2016, with \$924 million coming from sponsored programs and other restricted-fund activity. Sponsored programs came primarily from the National Institutes of Health, the National Science Foundation, NASA, the U.S. Department of Defense and the U.S. Department of Commerce.

CU also generates a significant amount of activity from technology transfer, having formed 114 companies, with 110 continuing to operate in Colorado.

The study identified \$797 million in student spending in 2016,

with visitors related to the campuses spending an estimated \$37.3 million.

The CU study comes on the heels of a study analyzing the economic impact of public higher education on Larimer and Weld counties. CSU, the UNC, Aims and Front Range generated economic impact of \$2.4 billion, supporting 39,677 jobs, according to the study by Emsi, a Moscow, Idaho-based firm.

- Operations spending — The annual day-to-day operational spending of the four colleges totals \$676.8 million in non-research payroll and purchases of supplies, professional services and other routine expenditures.

- Research — The impact of research activities — salaries, supply purchases, purchase of equipment — resulted in \$172.7 million of impact, not counting the long-term impact of 147 new U.S. patents, 43 licenses and 129 invention disclosures.

- Construction — Construction spending in the target year was \$78.9 million.

- Startups — The one-year impact of startup companies fostered by university research resulted in a \$35.8 million impact.

- Student spending — Students attracted to the region because of the colleges and those who stayed in the region for educational purposes resulted in increased spending of \$159.6 million. This number is net of the opportunity cost — spending from jobs and wages not earned because the students were in class instead of working.

- Alumni impact — The study quantified the one-year annual economic impact of alumni from the past 30 years working in the region. This totaled \$1.3 billion. Working alumni from years prior to the 30 considered in the study were not factored into this number.

The \$2.4 billion total impact equals about 9.6 percent of the gross regional product for the two counties. That number would support 39,677 jobs, according to the study report.

Education Fast Facts

- There are seven multi-district online charter schools, 20 multi-district online schools, four supplemental online programs, 10 single district online schools and 19 single district online programs in Colorado.

- In Colorado, there are 29 public institutions of higher education.

- In U.S. News and World Report's Best Graduate Schools edition of 2014, CSU's Department of Occupational Therapy ranked No. 6 in the nation, the vet program maintained the No. 3 spot, and the biological/agricultural engineering, chemistry, civil engineering, environmental/environmental health engineering, part-time MBA and statistics programs all ranked in the top 50.

- CU-Boulder's atomic/molecular/optical physics program is No. 1 in the nation, according to U.S. News & World Report's list of Best Graduate Schools for 2015.

- Other CU-Boulder programs ranking in the top 10 are ceramics, quantum physics, aerospace engineering, environmental law, geology and physical chemistry

- Another 26 CU-Boulder schools and programs ranked in the top 50 nationwide.

Employment

Unemployment rates continue historic lows

The unemployment rates in Boulder, Broomfield, Larimer and Weld counties during the first half of 2017 continued to be historically low as many businesses in the region were adding jobs.

Hovering around 2 percent unemployment, the region has been in lockstep or slightly below the state's rate of 2.3 percent and well below the nation's 4.4 percent mark as of June 2017.

At the mid-year point, businesses and organizations in the four-county region were employing 567,230 people, while 13,417 were looking for work.

Larimer County provides the most jobs in the region, approaching nearly 200,000, followed by Boulder County with about 182,000, Weld County with 150,000 and Broomfield County with 37,000.

The largest job gains have been in professional and business services, education,

health services, and leisure and hospitality. The largest declines have been in construction and information, according to the Colorado Department of Labor and Employment.

Health-care systems UCHealth, Banner Health and SCL Health System are three of the top four employers in the region providing nearly 14,000 jobs as a group.

Meat-processor and exporter JBS USA in Greeley comes in at No. 3 providing approximately 3,700 jobs.

Telecom giant Level 3 Communications Inc. in Broomfield has about 2,400 employees there, and wind blade and turbine manufacturer Vestas Blades America Inc. has about 2,400 in Windsor.

Can manufacturer Ball Corp. provides about 1,930 jobs at its headquarters in Broomfield, and its subsidiary, Ball Aerospace & Technologies Corp. based in

Boulder provides another 1,600 jobs.

A report compiled by CU Boulder's Business Research Division at the Leeds School of Business using data from the secretary of state's business registry, concluded that increased new-business filings year over year at mid-year 2017 has raised future employment expectations.

The report said most of the state's economic indicators showed strong growth year-over-year in the second quarter, and Colorado is expected to continue to add jobs throughout 2017.

"At this time, the national economy appears poised to continue the third-longest expansion in U.S. history," said economist Richard Wobbekind, executive director of the Business Research Division. "We see few warning signs that could derail this trajectory over the next year. Colorado's economy is still holding strong."

Largest Private-Sector employers by city

Here's the number of companies ranked in BizWest's top 200 largest private-sector employers, and their top employer and number of employees.

Total	\$4,884,989	743	\$5,942,949	734

1. Some fiscal year 2015 figures were modified to reflect updated information since the previous Annual Report.

2. Includes innovative motor vehicle credits, refundable alternative fuel vehicle credits and alternative fuel refueling facility credits.

3. Includes investment credits for licensed child-care centers, family care homes and employers providing licensed child-care facilities.

4. Credit became available income tax year 2015.

5. Credit became available income-tax year 2013. Credit first reported on 2016 Annual Report.

6. Credit became available income-tax year 2009. Credit first reported on 2016 Annual Report.

7. Applies to credits claimed on Corporate returns (Form 112) from income-tax years 2009 and prior that no longer appear due to form changes.

This includes "other enterprise zone credits" (vacant commercial building rehabilitation credit, research and experimental credit, job training credit, and rural technology credit) and "other credits" (old investment tax, crop and livestock contribution, historic property preservation, child care contribution, child care center/family care home investment, employer child care facility investment, school-to-career investment, Colorado works program, contaminated land redevelopment, low-income housing, aircraft manufacturer new employee, and job growth incentive) that became itemized income-tax year 2010.

* This credit is not available for reporting and is not included in the total. NR = Not releasable due to confidentiality requirements. The total includes NR data. Per §39-21-113(4), C.R.S., data derived from taxpayer returns is aggregated in order to protect the confidentiality of individual taxpayers. It is the Department's practice to release aggregated data only when there are at least three taxpayers in a given category and none of them represents more than 80 percent of the total.

N/A = Not Applicable

Note: The information in this table reflects corporate-income-tax transactions that occurred during the fiscal year, which is different from data by income-tax year. It is not limited to credits claimed on current-year returns. The information may encompass transactions over multiple years resulting from amended returns and/or corrected returns previously in error.

Federal labs

State's federal labs had \$2.6B economic impact in 2015

No. of federal research facilities in Colorado

National Rank
4

BOULDER — The 33 federally funded research facilities in Colorado contributed an estimated \$2.6 billion to the state's economy in 2015 and either directly or indirectly supported more than 17,600 jobs, according to a report by the Business Research Division of the Leeds School of Business at the University of Colorado Boulder.

The report, titled Economic and Fiscal Impacts of Federally Funded Research Facilities in Colorado FY2013-FY2015, said the economic impact of the labs on the Colorado economy was \$2.5 billion in fiscal years 2013 and 2014. It said the labs directly employed nearly 7,800 people in 2015, and supported an additional 9,800 jobs through the multiplier effect — people employed by companies benefiting from the labs' research, such as instrument makers and utility companies.

In 2015, the 33 labs had annual budgets totaling an estimated \$1.2 billion, the majority coming from federal funding, but the report did not provide a breakdown.

According to survey results, Colorado's federally funded scientists live in 30 of the state's 64 counties, with the highest number in Boulder, Larimer and Jefferson counties. Economic impact in Boulder, Jefferson and Larimer counties totaled \$1.1 billion, \$654 million, and \$195 million, respectively.

Boulder led the way, with 3,883 full-time and contract workers in 2015 who received an average annual income of \$99,840. Jefferson County had fewer federal employees — 2,823 — but they drew annual salaries averaging \$108,113. Larimer County had 889 employees, with an average annual salary of \$80,074, according to

the report.

This is the fourth economic-impact report produced by the Leeds School of Business for CO-LABS. Previous reports were produced in 2008, 2010 and 2013.

CO-LABS is a nonprofit consortium made up of Colorado federal research laboratories, research universities, state and local governments, economic-development organizations, private businesses and nonprofit organizations. CO-LABS is an acronym for Colorado Leveraging Assets for Better Science.

For the latest report, Brian Lewandowski, associate director of the Leeds School's Business Research Division, surveyed Colorado's federally funded research laboratories, from the Crops Research Laboratory in Fort Collins to the National Oceanic and Atmospheric Administration in Boulder and the National Renewable Energy Laboratory in Golden. He collected data on employees' educational attainment, organizational budgets, spinoff companies and technology transfer. Ten labs reported active commercialization programs, from tech transfer and licensed technology to spinoff companies and public-private partnerships with shared space or equipment.

"Colorado's federal research facilities conduct wide ranging basic and applied research that result in scientific and commercializable research advancements," Lewandowski said. "Beyond the research, these facilities play an important economic function in the Colorado economy, including employing a body of highly educated researchers and through the purchasing of goods and services within the Colorado economy."

The report pointed out that of those employed in federal laboratories, 55 percent have master's or doctoral degrees, compared with 15 percent statewide; and Colorado ranks fourth among states for the percentage of the workforce engaged in science and engineering jobs.

Brian Payer, CO-LABS' board chairman, said the report revealed that there is a "tremendous synergy between the laboratories, businesses and the community. The labs spur innovation through spin-out companies, technology licensing, cooperative work agreements, and access for formal and informal conversations with world-class experts across an incredible breadth of disciplines.

"In addition, we learned that people want to live here, making it easier for the labs to recruit top-notch talent to the state."

Dan Powers, CO-LABS's executive director, said the collective impact of the labs' research also ripples out to every state in the country.

"Ranging from partnership agreements to licensing of technology to outright free access to the research from these taxpayer-funded labs, thousands of companies throughout the United States representing hundreds of thousands of jobs utilize this science in ways that make us healthier, safer, more sustainable and global leaders in innovation," Powers said.

The study also summarized the federal science funding landscape, drawing from national reports to highlight Colorado's ranking among states in funding from the U.S. Department of Commerce (second), Department of Interior (second), NASA (third), Environmental Protection Agency (fifth) and National Science Foundation (sixth)

Energy

Region dominates traditional, renewable energy

Northern Colorado leads the state in oil production and wind turbine manufacturing, while the clean-tech industry, including solar firms, has maintained a strong presence in the Boulder Valley.

2016 oil production topped 116.4 million barrels statewide, with 103.99 million barrels, or 89.3 percent, produced in Weld County alone. An additional 909,545 barrels were produced in Boulder, Broomfield and Larimer counties, meaning that Northern Colorado produced 90 percent of the state's oil.

Weld County ranked first in natural-gas production in the state, displacing Garfield County for the second consecutive year. Weld County produced 641.7 million Mcf — or thousand cubic feet — compared with 496.3 million Mcf for Garfield County. Weld County accounted for about 30 percent of the state's natural-gas production.

Although oil and gas prices have struggled for the past several years, production in Northern Colorado has continued. Lower prices have prompted widespread layoffs in the industry, however. Oil and gas development in Colorado provided a \$31.7 billion boost to the state's economy in 2014 and supported more than 102,700 jobs, according to a study by the Business Research Division of the Leeds School of Business at the University of Colorado Boulder. The study, commissioned by the Colorado Oil and Gas Association, also found that the industry generated \$1.2 billion in property, income and severance taxes, as well as through public land leases and royalties.

Renewable-energy industries also have gained strength in 2016. Danish wind turbine maker Vestas Wind Systems A/S (OMX: VWS), which operates two factories in Brighton and one each in Windsor and Pueblo, employs about 3,000 people statewide.

In the Boulder Valley, solar companies such as Namaste Solar and Clean Energy Collective have maintained a strong presence in the region.

Health Care

Providers expand, merge, acquire

Courtesy UCHealth Longmont

As Congress continues to spar over what the U.S. health-care system eventually will look like, health-care providers in the region are moving forward with expansion plans and forging new partnerships.

Aurora-based UCHealth has been the most aggressive, building hospitals in Broomfield, which opened last year; Longmont, which opened in August; and Greeley, where construction began in July. Those hospitals are in addition to hospitals UCHealth operates in

Fort Collins and Loveland. UCHealth also has opened stand-alone emergency rooms and acquired clinics and built medical centers in the region.

Longmont United Hospital last year partnered with Centura Health, and Platte Valley Medical Center in Brighton affiliated with Broomfield-based SCL Health System. Boulder Community Health in Boulder remains the lone independent hospital in the region, but recently forged

a partnership with Ernest Health on a rehabilitation hospital in Lafayette as BCH attempts to maintain its independence.

Large health-care systems Banner Medical Group and UCHealth have been acquiring and expanding services and building new emergency and urgent-care facilities that have a primary-care component.

In Fort Collins, Banner Fort Collins Medical Center opened last year.

Across the board, health-care providers say there is a shortage of health-care workers, from physicians to receptionists.

Coloradans shopping for health insurance on the private market could see eye-popping rate increases averaging 27 percent in 2018, according to the Colorado Division of Insurance.

As of June, 189,937 Coloradans, about 20,000 more than 2016, enrolled in private health insurance and dental insurance on Connect for Health Colorado, the state's health-care exchange. Insurance officials blame the increase on federal uncertainty about what is going to happen to the Affordable Care Act.

Businesses purchasing small-market plans for their employees could see premiums go up by 7.5 percent, according to the division.

Several health-care providers — including physician groups, hospitals, and health and wellness clubs — are teaming to create their own “direct primary care” model, a type of billing and payment arrangement made between patients and providers for primary care, without sending claims to insurance providers.

A woman with dark hair pulled back, wearing a bright red blazer over a dark top, a gold chain necklace, and a gold watch. She is smiling and looking towards the camera while holding a white smartphone in her hands. The background is a bright, out-of-focus indoor setting with large windows.

A BETTER WAY TO TAKE CARE OF BUSINESS

You don't profit from sick employees. Why does your health provider?

In an industry built on fee-for-service care, Kaiser Permanente succeeds because we're built around prevention and the highest quality care. One *Harvard Business Review* article described our care as "untainted by any economic conflict of interest."* And an industry report by *The Economist* said we promote economy and quality care with "no financial motive to order unnecessary procedures."†

Choose better. Choose Kaiser Permanente.

* Lew McCreary, "Kaiser Permanente's Innovation on the Front Lines," *Harvard Business Review*, September 2010.

† "Another American Way," *The Economist*, May 1, 2010.

WE MENDED A FAILING HEART AND KEPT THEIR ROMANCE ALIVE

When you have that newlywed glow, everything seems rosy. So when Jean Richter started feeling short of breath, she wasn't initially concerned. But then her symptoms worsened and her beloved husband, Dave, had to rush her to the Foothills Hospital Emergency Department.

Jean was diagnosed with heart failure, a chronic condition that has a 50% survival rate within five years of diagnosis if not treated correctly. Luckily for Jean, Boulder Community Health recently opened the first

specialized Heart Failure Clinic in Boulder County. Dr. Scott Blois's expertise with the latest treatment options set Jean on a remarkable journey back to a full active life.

"I have a wonderful husband, five incredible daughters and 13 grandkids I adore," says Jean. "I'm so happy we can hike, travel and have fun together again."

Read Jean's story at bch.org/healinghearts or call 303-442-2395 for information about Boulder County's first Heart Failure Clinic.

The Embassy Suites by Hilton in Boulder includes 6,500 square feet of conference space.

Christopher Wood / BizWest

Hospitality

Hotel developments continue to check in throughout region

Hotel construction continues at a rapid pace in the Boulder Valley and Northern Colorado, with hundreds of rooms being added to the market.

Recent or ongoing projects include:

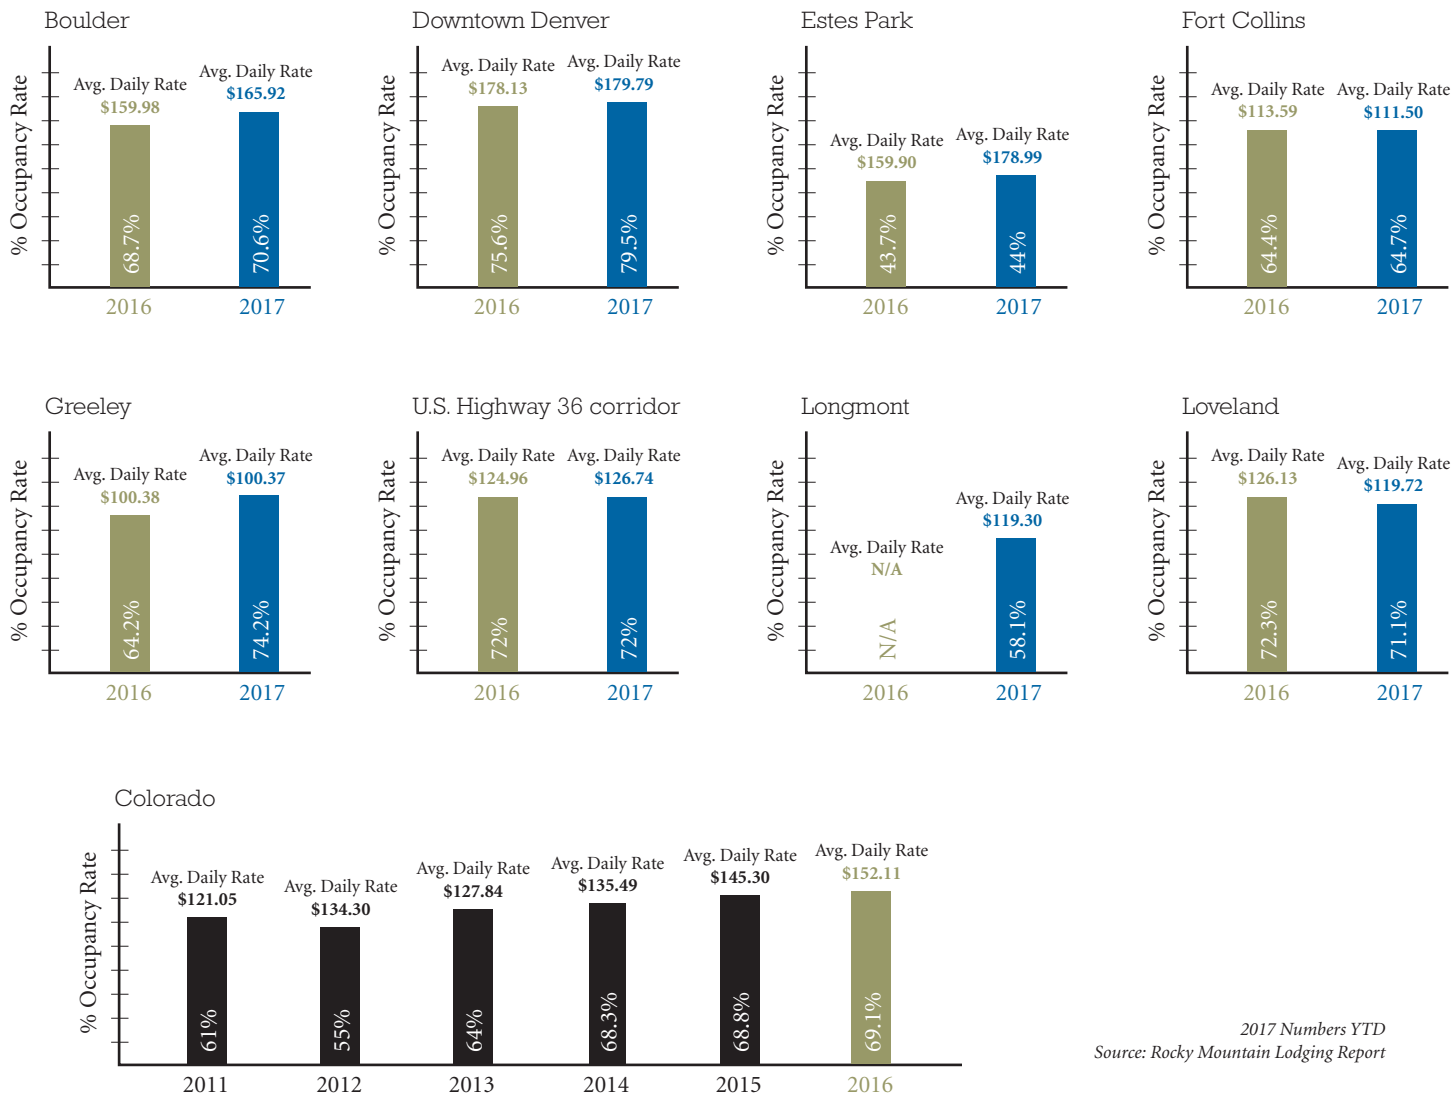

- Fort Collins-based Bohemian Cos., Loveland-based McWhinney Real Estate Services Inc., and Sage Hospitality in Denver are teaming to build the five-story, 162-room The Elizabeth Hotel at 354 Walnut St. in Fort Collins. The site is bordered by Walnut, Mountain, Jefferson and Chestnut streets.
- Construction is underway on a Residence Inn at the Village Shopping Center, 2550 Canyon Blvd. in Boulder. The hotel will include 171 rooms.
- Construction is almost complete on two hotels at the Golden Buff redevelopment at 26th Street and Canyon Boulevard in Boul-

der. The redevelopment includes a 204-room Embassy Suites and a 171-room Hilton Garden Inn.

- Hensel Phelps Construction Co. and private investors recently completed construction of a 147-room DoubleTree by Hilton hotel and conference center downtown at 919 Seventh St. in Greeley. The conference center includes 14,000 square feet.
- Windsor developers have proposed the 300-room, \$110 million PeliGrande Resort and Windsor Conference Center in Windsor. The project is dependent on a Regional Tourism Grant under consideration by the state of Colorado.

Numerous smaller hotels are have either been announced or are under construction in Boulder, Fort Collins, Greeley, Johnstown, Longmont and other communities.

Festivals

Boulder

Festival	Month	Description
Boulder Creek Festival	May	Three days of events, activities, food and entertainment.
Boulder Craft Beer Festival	August	Taste beers from Boulder County's best craft breweries.
Boulder Art & JazzFest	July	Celebrate July 4 with arts, crafts, food and jazz.
Pearl Street Arts Fest	July	Artists from around the country converge in Boulder for a visual arts festival.
Boulder County Fair	August	The fair is host to a livestock show, Pro rodeo, Mexican rodeo, demolition derby, tractor pull and much more.
Colorado Music Festival	June-August	Boulder plays host to legendary soloists and orchestras at Chautauqua Auditorium.
Bands on the Bricks	July-August	Outdoor summer concert series that takes place on the Pearl Street Mall.
Colorado Shakespeare Festival	July-August	Experience Shakespeare in an unmatched setting on the CU-Boulder campus.
Boulder Asian Festival	August	Arts, crafts, food and musical performances.

Fort Collins

Festival	Month	Description
Colorado Brewers Festival	June	The largest showcase of Colorado breweries.
Bohemian Nights at NewWestFest	August	Community festival with vendors, bands, food and a carnival.
Nelson's Old Town Car Show	September	Car show.
FORToberfest	September	Celebration of bikes, bands and beer.
Taste of Fort Collins	June	Festival highlighting local food and featuring live music.

Greeley

Festival	Month	Description
UNC/Greeley Jazz Festival	April	Jazz headliners from all over the world, plus clinic for students.
Friday Fest	May - September	Go-Cup District and concerts in downtown Greeley.
Greeley Blues Jam	June	Blues, food and drink in downtown Greeley.
Greeley Stampede	June - July	Rodeo, country music, carnival and Western art show.
Weld County Fair	July	A complete fair promoting the county's agricultural heritage.
Colorado Farm Show	January	Agricultural symposium and trade show.

Longmont

Festival	Month	Description
Colorado Latino Festival	June	Entertainment, latin cuisine, activities and resources.
Boulder County Fair	July - August	Oldest state fair in Colorado.

Loveland

Festival	Month	Description
Loveland's Fire & Ice Winter Festival	January	Snow sculpting competitions, ice sculptures, fireworks and light shows, live music.
Loveland Loves BBQ, Bands and Brews	July	Music, beer and BBQ festival.
Old Fashioned Corn Roast Festival	August	Celebration of corn with contest, parade and all things corn.
Thunder in the Rockies Bike Rally	August - September	Harley Davidson bike rally with music, vendors, food.
ARISE Music Festival	August	Music festival.

Manufacturing/Technology

Tech firms, manufacturers continue expansions

Joel Blocker for BizWest

Carestream Health's Windsor plant employs about 400, thanks to growth from picking up a contract from Kodak Alaris.

Manufacturing, tech and innovation are part of the fabric of Colorado's economy.

The state's federally-funded laboratories, many of which are located on the Front Range, have a \$2.6 billion economic impact in Colorado, according to a study from University of Colorado Boulder.

A continuing development in the construction of Google's campus in Boulder near 30th and Pearl Streets, which will house up to 1,500 people. The company's Colorado workforce is more than 650 employees so far.

Several area company in manufacturing and technology have experienced growth this year. Greeley-based Pilgrim's Pride, a chicken processor, acquired Minnesota-based GNP co. for \$350 million in cash. In-Situ Inc., a manufacturer of water monitoring systems in Fort Collins, acquired Australian-based Measuring and Control Equipment. Surna Inc., which designs and makes indoor growing facilities, landed a contract for equipping a \$835,000 can-

nabis growhouse in Vancouver. Datavail Corp., a Broomfield company that provides managed data services, acquired Toronto-based Navantis Inc. And Zayo Holding Group Inc. closed on its acquisition of Electric Lightwave, estimated to be at about \$1.4 billion.

One of the biggest ongoing acquisitions is that of Level 3 Communications, which is in the process of being purchased by CenturyLink for more than \$34 billion. That deal is expected to be completed in September.

Of course, companies are not without their challenges, mainly from changes to policy and politics. Funding for federal labs has become uncertain under the new administration, as it shows that studying climate change is not a priority. This change in political climate has also impacted the clean-tech industry, which looks to state and local policies as well as international clients to keep its companies growing. Tech companies have leant their support to the cause of net neutrality.

International-trade Resources

The following organizations assist with various aspects of international trade in Colorado.

CHAMBER OF THE AMERICAS
720 Kipling St., Suite 13
Denver, CO 80215
303-462-1275
www.chamberoftheamericas.com
What it does: Nonprofit organization dedicated to helping businesses expand their markets in North, Central and South America.

COLORADO OFFICE OF ECONOMIC DEVELOPMENT AND INTERNATIONAL TRADE
1625 Broadway, Suite 2700
Denver, CO 80202
303-892-3840
www.choosecolorado.com
What it does: Maintains a network of international consultants that connect Colorado companies to global opportunities.

OVERSEAS PRIVATE INVESTMENT CORP.
1100 New York Ave. N.W.
Washington, D.C. 20527
202-336-8400
www.opic.gov
What it does: Government agency that helps U.S. businesses invest in emerging markets.

WORLD TRADE CENTER DENVER
2650 E. 40th Ave.
Denver, CO 80205
303-592-5760
www.wtcdenver.org
What it does: Provides comprehensive international trade services and global contacts to facilitate and expand trade and international business throughout Colorado and the Rocky Mountain region.

Startups

The Greeley metropolitan statistical area recorded a boom in jobs created by startups in 2014, while the Boulder, Denver-Aurora-Lakewood and Fort Collins-Loveland MSAs lagged the peak years of 2006-2007. 2014 is the latest year for which data are available.

Job losses from exiting establishments have declined since the Recession years. 2014 is the latest year for which data are available.

Startup creation in 2014 reached their highest level since 2007 in the Greeley metropolitan statistical area, with the Boulder and Fort Collins-Loveland MSAs reaching their highest levels since 2008. The Denver-Aurora-Lakewood MSA — which includes Broomfield County — recorded the highest startup creation since 2007. 2014 represents the latest year for which startup data is available.

Establishments exiting local metropolitan statistical areas dropped to their lowest levels in more than a decade in 2014, the latest year for which data are available.

Natural/Organic

Region a hub for natural/organic sector

Courtesy Justin's

Justin Gold began experimenting with different flavors for almond butter before introducing the product first at the Boulder Farmers Market. Food giant Hormel bought the company in 2016 for \$286 million.

With about 270 certified organic farms and ranches in Colorado, it's not a surprise that the Front Range has become a hub for natural and organic food.

National brands like Justin's Nut Butter, Bhakti Chai, Udi's and Celestial Seasonings call Boulder their home.

In 2011, an economic impact study by CU-Boulder's Business Research Division found that members the natural and organic industry group Naturally Boulder contributed to more than 8,200 jobs and \$2.49 billion statewide.

It's an interesting time for food retail, as e-commerce challenges the traditional brick-and-mortar grocery market — Amazon purchased Whole Foods, while online retailers like Thrive Market have become increasingly popular.

Boulder Valley and North Colorado's natural food companies have adapted to that. Companies like Wild Zora sell predominantly on their own website and at Amazon, opting to only be in select retail stores.

Other companies, like Made in Nature, have leaned into brick-and-mortar stores, signing a deal to offer its products in Walmart nationally.

Several area companies have gotten the attention of national brands.

General Mills invested \$3 million in Boulder granola company Purely Elizabeth. Flaxseed milk and yogurt company Good Karma got a minority investment and distribution deal from Dean Foods Inc.

Chobani chose Boulder as one of its key locations to scout for companies for its natural food incubator program.]

Even the area's biggest natural food companies got attention from bigger players: French dairy company Danone acquired The WhiteWave Foods Co. in April for \$12.5 billion.

Although it hasn't all been positive for the natural and organic industry — Boulder Brands closed its Evol burrito production facility, slashing 27 jobs and relocating the facility to Arkansas — the industry is still becoming synonymous with the area.

And small companies are continuing to grow: Kombucha company Rowdy Mermaid has spent the year scaling up. It went from a 900 square-foot facility to 6,000 square feet, and then added another 6,000 square feet in May. The company also raised \$2 million in its Series A round and can be found on taps throughout Boulder and Denver.

Economic impact of Naturally Boulder members

	Employment	Labor income (millions)	Output (millions)
Direct effect	6,996	\$234.1	\$303.1
Indirect effect	471	\$27.9	\$83.3
Induced effect	810	\$35	\$105.5
Total effect	8,278	\$297.1	\$491.9

Note: Extrapolating findings brings economic impact to \$2.49 billion statewide. Source: 2001 Natural and Organic Industry Study, Business Research Division, Leeds School of Business, University of Colorado Boulder

Outdoor Equipment Industry

Outdoor industry generates \$28B impact

Consumers spend \$28 billion in Colorado on outdoor recreation, a figure that shows the importance of the outdoors to the Centennial State.

In fact, biking, hiking, camping and other outdoor activities provide 229,000 jobs and \$10 billion in annual wages, according to the Outdoor Industry Association.

In a state that boasts some of the country's most sought-after mountains and trails, 71 percent of Colorado's 5.7 million residents participate in outdoor rec.

That activity has direct impact on small and enterprise businesses.

Broomfield's Free the World Inc., which does business as Xero Shoes, launched an equity crowdfunding campaign to raise \$3 million. The minimalist shoe company offered 750,000 shares at \$4 each, and projects revenue of \$7 million in 2017.

And companies with household names, like Fort Collins-based OtterBox Products LLC, added customizable coolers that can keep ice cold for 14 days to its lineup. Ultra-durable smartphone cases made OtterBox popular in the marketplace.

Vail Resorts Inc., based in Broomfield, acquired Stowe Mountain Resort in Vermont for \$41 million. Boulder's TeamSnap, a company that makes apps for helping organize youth and competitive sports leagues, acquired FanAppEvents, a Missouri-based tournament and league management company.

Even government has participated in the outdoor industry. The United States congress launched a bipartisan caucus for the outdoor recreation industry, with local Rep. Jared Polis as one of the co-chairs. At the local government level, the city of Boulder expanded free public Wi-Fi to Boulder Reservoir and Scott Carpenter Park.

But perhaps the biggest indicator that Colorado's outdoor industry is a major economic driver is the state's ability to lure the Outdoor Retailer Show from Salt Lake City to Denver.

The win brings three major trade shows to Colorado starting in January 2018. The Outdoor Retailer + Snow Show, the Outdoor Retailer Summer Market and the Outdoor Retailer Winter Market will all be in Denver.

Colorado and Denver together paid about \$3.4 million in incentives to bring the trade shows to the area, which is expected to bring a return on investment — the shows bring in about \$45 million each.

And with this event as one of Colorado's crown jewels, don't expect the outdoor industry to go anywhere: the events will be in Denver for the next five years.

Real Estate & Construction

Market calms for residential, commercial real estate

File photo

Residential real estate has posted strong numbers throughout the year, with low inventories driving prices up and homebuilders working to meet demand.

The conundrum is that while it's a seller's market, it's difficult for someone to buy in a better neighborhood without paying more.

Builders of single-family homes and developers of apartment complexes have thousands of units either in the planning or construction stages throughout the region, which should, over time, alleviate the inventory problem. The trend is for homebuilders to develop land in smaller cities next to the larger ones in the region.

Access to water continues to drive up tap fees for developers.

But recently, the housing markets in the Boulder Valley and Northern Colorado have begun to simmer after a few scorching years of increasing prices, driven mainly by low inventory.

As fall begins, there are indications of calm returning to the market, as some communities in Northern Colorado are reporting an increase in inventory for single-family housing during August. And regionwide, total inventory was essentially flat — up less than 1 percent — from the same time last year, which could be significant after a decline of 7.6 percent between August 2015 and August 2016.

Median home prices in the region's two largest cities — Boulder and Fort Collins — began to taper off in August, a combination of a seasonal slowdown and more homes on the market. But

prices were holding steady in other submarkets of the region, holding value for homeowners.

The median price for a single-family home in Boulder, notoriously high having exceeded \$1 million in May 2017, had dropped nearly a quarter-million dollars by August, but still double or more than home prices elsewhere in the region.

Commercially, the markets are experiencing a similar, but not as sharp, decline in available office space in most areas in the region.

Commercial brokers say that the law of supply and demand is at play, with rental rates spiking because of low supply and high demand. The environment in Boulder has drawn the attention of national institutional investors who have made several large plays within the last two years. They see a market with prices that leave room for profits as landlords or a quick flip. The commercial markets in other areas within the region are less volatile, with more mixed-use developments either recently completed or in the pipeline, addressing needs for commercial, retail and housing.

Within the past year, the apartment market has become extremely active, with sales of apartment complexes to outside and local investors escalating. The demand for this type of housing is being driven by an increasing population, plus builders are still wary of constructing condominiums because of the state's tough construction defects law that targets builders of condos.

Transportation & Infrastructure

Roads, airports bring region together

Transportation and infrastructure improvement plans abound in the Boulder Valley and Northern Colorado.

A long-sought climbing lane was recently completed on Interstate 25 south of Berthoud, a \$10.3 million project aimed at addressing frequent bottlenecks. The region also recently received a \$15 million grant to widen I-25 between Colorado Highways 14 and 392, a project that ultimately will cost \$230 million.

Replacement of two bridges that cross I-25 at Crossroads Boulevard in Loveland also has begun.

One of the region's most prominent projects — the widening of the Boulder Turnpike on U.S. 36 — added a toll lane in each direction between Boulder and Denver that also is being used for bus rapid transit. Vehicles carrying three or more people can use the lanes for free.

Mason Street Project

www.FCgov.com/mason/

Northern Integrated Supply Project

www.northernwater.org/WaterProjects/NISP.aspx

The project also refurbished the existing general-purpose lanes and added a commuter bike lane.

Major improvements are

underway on U.S. Highway 34 between Estes Park and Loveland, repairing damage from the 2013 floods. The \$50 million project began in mid-2016. Similar improvements are being made along Colorado Highway 119 between Longmont and the interstate, also repairing flood damage.

Bus service between Fort Collins and Longmont — known as FLEX — was expanded in 2016 to Boulder, thanks to a \$1.15 million grant from the Denver Regional Council of Governments.

Bus service also was added in mid-2015 between Fort Collins and Denver. Bustang, operated by the Colorado Department of Transportation, saw higher-than-anticipated ridership during its first year, according to CDOT.

Plans for rapid transit don't stop there, however. A \$2.8 million study evaluating the feasibility of high-speed rail from Fort Collins to Pueblo has identified five potential routes that could carry more than 10 million passengers annually.

A Colorado route also have been selected as a finalist for Hyper-loop One, a high-speed transportation network that would run 360 miles from Cheyenne, Wyo., to Pueblo, with a leg that would extend to Vail. The high-tech system would send passengers from Greeley to Denver in six minutes.

Northeast Colorado highway construction/major arteries projects, 2017

Project	Location	Timeline	Cost
Colorado Highway 7 (Lower)	Lyons to Raymond	Starts summer 2019	\$20 million to \$50 million
Colorado Highway 14 and U.S. Highway 287	Colorado Highway 14, west of Fort Collins	Starts spring 2017	\$1 million to \$4 million
Colorado Highway 60	Weld County, providing access from Milliken to U.S. Highway 85 and Interstate 25	Starts winter 2016/2017	\$10 million to \$20 million
I-25 at St. Vrain Creek	North of interchange of I-25 and Colorado Highway 119	Started winter 2015/2016	\$4 million to \$10 million
I-25 Crossroads Bridge	Replacement of two bridges on I-25 that cross Crossroads Boulevard	Completes January 2018	\$22.1 million
Colorado Highway 119, Boulder Canyon	From Boulder to the tunnel.	Started 2016	\$4 million to \$10 million
Colorado Highway 257, Milliken	Connecting Colorado Highway 60 with U.S. Highway 34	Started winter 2015/2016	\$10 million to \$20 million
U.S. Highway 34, Big Thompson Canyon	Loveland to Estes Park	Started 2016	\$50 million
U.S. Highway 34 Business in Weld County	Between mile posts 13.5 and 14.7	Starts spring 2017	\$4 million to \$10 million
U.S. Highway 287	Colorado Highway 1 to LaPorte Bypass	Completes August 2018	\$26.8 million

Economic impact of regional airports

The Colorado Department of Transportation conducted a statewide study of the economic impact of airports in 2013. Here are estimated economic impacts for airports in the region. Data for jobs and payroll reflect a multiplier effect.

Airport	Jobs	Payroll	Total economic output
Boulder Municipal Airport	340	\$19.6 million	\$69.9 million
Denver International Airport	183,878	\$8.48 billion	\$25.82 billion
Erie Municipal Airport	217	\$4.9 million	\$12.8 million
Greeley-Weld County Airport	672	\$30.8 million	\$94.1 million
Northern Colorado Regional Airport	826	\$24.8 million	\$129.4 million
Platte Valley Airport	1	\$58,000	\$113,000
Rocky Mountain Metropolitan Airport	2,670	\$153.9 million	\$460.5 million

Northern Colorado Economic Alliance

“Investing in the Region’s Future”

Economic Growth and Sustainability

Maintaining a vibrant economy and economic growth requires ongoing intentional effort. Economic development organizations play a vital role in supporting the needs and well being of existing business and attracting new business and industry that will drive jobs and opportunity in the future.

Quality of Life Maintenance

Maintaining the outstanding quality of life we enjoy in Northern Colorado is reliant on vibrant economic drivers. Economy and business is never static, and as business is critical to supporting infrastructure needs, it is essential to always be gardening for future economic opportunity.

Infrastructure Investment

Attracting new business and industry to the region is accompanied by infrastructure investments that create additional economic opportunity for business in the region and result in long term resources.

Workforce Utilization

Having and growing job opportunities that utilize the skills of the talent in the region is necessary to achieving future economic growth. With robust educational resources and a highly educated workforce, it is important to continue to attract primary employers and better paying jobs to Northern Colorado.

Advocacy and Leadership

Maintaining a positive business climate is critical to maintaining and growing a healthy economy. NCEA continually advocates for sensible regulation and taxation policies and helps to create a synergistic business environment to capitalize on economic opportunity.

New Business Creation

New business formation is a key differentiator in the economic output of a region. Fostering an environment that encourages entrepreneurship is a vital part of sustaining that culture. Often, new primary employers that locate to the region create opportunity for both existing and new small business.
