BUSINESS ANSWERS TO PRESSING B2B MATTERS

A/E/C INDUSTRY

What does it take to be more than just a typical engineer?

For many, engineers conjure up a myriad of thoughts and wisecracks. Some envision a person hunched over a desk calculating equations while others imagine someone avoiding personal interaction at all costs. When I decided to become a civil engineer, I admit crunching numbers and limiting my interaction in front of crowds was appealing - I had, and still deal with "stage fright".

JC Cundall, PE
Senior Project Engineer
Farnsworth Group, Inc.

However, in the last 16 years, I built upon my fundamental strengths in science and math to develop a broader competence in how I interact with my clients. Whether by listening more intently to a client's needs, learning to be a better writer, or by joining Toastmasters to improve how I present, continuously searching for new ways to improve has taught me this - while an understanding of science and math are crucial, to be a better engineer, developing an effective communication style is equally important.

MORTGAGE

Is now a good time to refinance, buy or build a new home?

Mortgage rates have remained competitive over the last several months and remain historically low. A true mortgage professional will review your lifestyle and budget and suggest flexible financing solutions that, when combined with a solid rate, will appeal to you.

JoDean Lippert,

Manager
First National Bank

Look for someone local who understands the market and can react quickly to your needs. Then, when you are ready, you'll be able to make an offer on a house rather quickly while securing the best possible rate.

The housing market typically slows down during the winter, so getting pre-approved now will pay off this spring as more people begin to look for new homes. Get in touch with us if you have additional questions.

HEALTH CARE

Have you heard of Rolwing® Structural Integration?

Rolwing® Structural Integration (SI) is a form of hands-on manipulation and movement education that systematically reorganizes the connective tissues that maintain a body's structure. Through a methodical progression of ten sessions, Rolfers™ strive to release, realign and balance the whole body.

Rolwing SI was developed over 50 years ago by Dr. Ida P. Rolf, who called her work "structural integration". The work was later nicknamed "Rolwing," the brand owned by The Rolf Institute®, the school she founded in 1971 in Boulder, CO.

Rolwing SI is not a form of massage; it is the original form of structural integration. Rolfers differ from massage therapists not only in what they manipulate, but in how they approach and analyze the body. Rolwing SI is not just a "quick fix" that may revert; it is intended for long-term resolution.

For more information on how Rolwing SI can help your employees, call us or visit www.rolf.org.

ACCOUNTING

Filing 2014 taxes? Be aware of this critical tax issue.

After several years in the making, the IRS issued the final regulations for Capitalization of Tangible Property Expenditures and Asset Disposition. The regulations provide very detailed and structured guidance on the treatment of expenditures paid to acquire, produce, improve, or dispose tangible property. These new regulations are the most comprehensive change in tax law regarding tangible property and must be followed virtually by all taxpayers for tax years beginning on or after January 1, 2014.

To comply, existing businesses will need to adhere to the new rules in their accounting reporting and also file Form(s) 3115 - Application for Change in Accounting Method and certain Elections with their 2014 tax returns.

For new businesses that started on or after January 1, 2014, no Form 3115 needs to be filed, but the businesses need to follow the new tangible property rules for their accounting reporting and file certain Elections with their 2014 tax returns.

Be sure to speak with your tax advisor to ensure you are in compliance.

A new, expanded Book of Lists reflects power of larger region

Think about it: Three universities, a host of federal laboratories, high-tech firms, agribusinesses, clean-tech and traditional energy companies, real estate, financial institutions, retail and service businesses.

These are just a sampling of the sectors that are fostering new ties between the Boulder Valley and Northern Colorado. That trend was represented in March 2014 with the combination of the Boulder County Business Report and the Northern Colorado Business Report to form BizWest, a biweekly business journal covering Boulder, Broomfield, Larimer and Weld counties.

Companies in all industries have crossed county lines to expand their businesses, acquire companies or reach new customers. That drove the decision to combine the two publications, and with that combination, it made sense also to combine the new publication's lists ranking businesses in a variety of

industries.

The result is this expanded Book of Lists. Readers will note that many lists now reflect businesses in all four counties. In some cases, however, we've opted to publish separate lists for the Boulder Valley and Northern Colorado.

The Book of Lists compiles all of the lists published in the Boulder County Business Report, the Northern Colorado Business Report and BizWest during 2014, plus a number of lists researched fresh for this publication. It's an extremely valuable tool for finding intelligence on customers, prospects or competitors.

Listings include addresses, phone numbers, key contacts, descriptions of products and services, revenues and employment.

And the print edition is just the beginning. Readers can also find the Book of Lists online, in a digital edition, where every page is reproduced online. The entire Book of Lists is also available for

About the cover: BizWest continues its tradition of highlighting public art on the cover of the Book of Lists. DeeDee Morrison's "April Charm" was installed at the Waneka Lake Boathouse in Lafayette in 2014. Made of aluminum, a warm glow slowly emanates from the sculpture at sundown.
